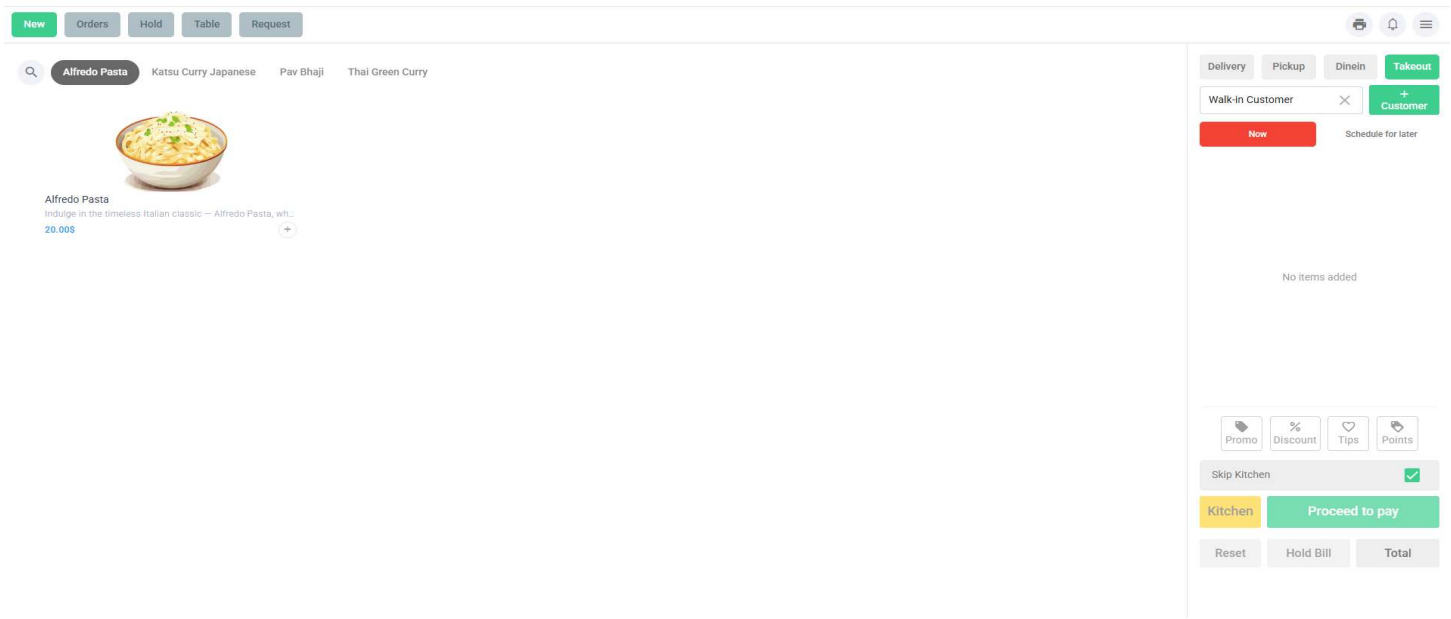
"Create an Order" Mockup



Object: Order placed
Functions/ Fields:
1) Items (Based on items created: Alfredo, Thai, Katsu, Pavbhaji),
2) Order Status (New, Orders (placed), Hold, Table, Request)
3) Delivery Mode (Delivery, Pickup, Dineln, Takeout)
4) Customer (Walkin, Existing)
5) Delivery Time (Scheduled Now, Later)
6) Discount (Promo, %, Tips, Points)
7) Kitchen (Skip/ In Kitchen List)
8) Payment Methods (Based on Payment Methods setup by Merchant/User)
9) Payment Status (Reset, hold, Pay in total "Total")

Create an Order Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result
CO01	Items	Add item	Lower bound – 0 items	Try to “Proceed to pay” with **no items**	System should show warning “No items added / Cannot proceed without items” and stay on page.
CO02	Items	Add item	Lower bound – quantity 1	Add **1 unit** of Alfredo Pasta	Item appears in order list, total = item price.
CO03	Items	Quantity	Upper bound – max quantity	Increase quantity to maximum allowed (e.g., 99 or 999)	Quantity accepted; total correctly calculated; no overflow.
CO04	Items	Quantity	Above upper bound	Try to exceed max quantity via + button or manual entry	Quantity stops at max or validation prevents higher value; no crash.
CO05	Items	Multiple items	Boundary of items per order	Add items until max line items per order (e.g., 100)	All lines added; scroll works; totals correct; performance acceptable.
CO06	Items	Remove item	Lower bound – last item	Add 1 item, then remove it	Order list becomes empty, “No items added” message displayed; buttons requiring items (Kitchen / Proceed to pay) react per spec.
CO07	Order Type	Order type buttons	Lower bound – default type	Open New Order screen	One order type (e.g. **Takeout**) selected by default; others unselected.
CO08	Order Type	Switch order type	Boundary between types	Click Delivery → Pickup → Dinein → Takeout in sequence	Order data (items, total) stays same while type changes; only one type active at a time.
CO09	Customer	Customer selector	Lower bound – Walk-in	Keep default “Walk-in Customer”	Order can be created and paid without named customer; no validation error.
CO10	Customer	Customer selector	Upper bound – long name	Select customer with very long name (max length)	Name displays correctly or with ellipsis; layout not broken.
CO11	Delivery Time	Now / Schedule	Lower bound – Now	Keep **Now** selected	Order is treated as immediate; no scheduling fields required.
CO12	Delivery Time	Now / Schedule	Upper bound – schedule in past	Choose “Schedule for later” and set past time (if allowed UI)	System rejects with validation message; cannot save.
CO13	Delivery Time	Now / Schedule	Upper bound – schedule at far future	Schedule at maximum allowed date/time	Order accepted; stored as future order; no error.
CO14	Price	Item price	Lower bound – smallest allowed price	Item with price = minimum non-zero (e.g., 0.01)	Total uses correct rounding; can proceed to pay.
CO15	Price	Order total	Upper bound – very large total	Use high-priced items + max quantity	Total shows correctly with currency, no numeric overflow or truncation.
CO16	Promo	Promo button	Lower bound – no promo	Leave Promo unused	Order total unchanged; no promo labels.
CO17	Promo	Promo application	Upper bound – 100% discount	Apply 100% promo	Order total becomes 0, but still can be completed if business rules allow; tax/fees respected.
CO18	Discount	Discount value	Negative / >100% boundary	Try to input negative discount or >100%	System rejects as invalid; shows validation message.
CO19	Tips	Tips amount	Lower bound – 0	No tip added	Total remains just subtotal + tax; order completes successfully.
CO20	Tips	Tips amount	Upper bound – max tip	Add tip equal to max allowed (e.g., equal to subtotal)	Total correct; no overflow.
CO21	Points	Points usage	Lower bound – 0 points	Select customer with 0 loyalty points	Points option disabled or message “No points available”.
CO22	Points	Points usage	Upper bound – more points than order value	Redeem maximum available points	Redemption capped to order value; total not negative.
CO23	Skip Kitchen	Skip Kitchen checkbox	Boundary – on/off	Toggle checkbox on and off	When ON, order bypasses kitchen printing / routing; when OFF, normal kitchen flow triggered on Kitchen/Proceed to pay.
CO24	Kitchen Button	Send to kitchen	Lower bound – 1 item	Add 1 item and tap **Kitchen**	Kitchen ticket printed/sent once; order stays in New/Unpaid state (per spec).
CO25	Proceed to Pay	Payment trigger	Boundary – with valid order	Add valid items, then **Proceed to pay**	Navigates to payment screen with correct amount and order details.
CO26	Proceed to Pay	Validation	Attempt with missing mandatory info	If customer is required for Delivery, choose Delivery but no customer, then Proceed to pay	System stops and shows “Customer required for Delivery” (or equivalent).
CO27	Hold Bill	Hold action	Lower bound – normal order	Add 1 item, tap **Hold Bill**	Order saved as “Held”; disappears from New tab and appears under Hold/Hold Orders list.
CO28	Reset	Reset button	Boundary – existing items	Add multiple items, then **Reset**	All items, promos, discounts, tips, and points cleared; screen returns to initial empty state.
CO29	Tabs	Navigation	Between New / Orders / Hold / Table / Request	Switch between tabs with existing unsaved order	Behaviour matches spec (either warn before leaving, auto-save as draft/hold, or discard). No data corruption.
CO30	Categories	Menu categories row	Lower bound – 1 category	Only 1 category with items	Category tab visible and selected; items load correctly.
CO31	Categories	Menu categories row	Upper bound – many categories	Configure many categories so row scrolls	UI allows horizontal scrolling or wrapping; selection switches items reliably.

Create an Order Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result	Actual Result	Issues
CO01	Items	Add item	Lower bound – 0 items	Try to "Proceed to pay" with **no items**	All buttons are greyed out until items are added	Order cannot be placed. All buttons are greyed out until items are added	0
CO02	Items	Add item	Lower bound – quantity 1	Add **1 unit** of Alfredo Pasta	Item appears in order list, total = item price.	Item appears in order list, total = item price.	0
CO03	Items	Quantity	Upper bound – max quantity	Increase quantity to maximum allowed (e.g., 99 or 999)	Quantity accepted; total correctly calculated; no overflow.	Quantity accepted; total correctly calculated; no overflow.	0
CO04	Items	Quantity	Above upper bound	Try to exceed max quantity via + button or manual entry	Quantity stops at max or validation prevents higher value; no crash.	No Warnings Setup for Upper Bound on item quantity	1
CO05	Items	Multiple items	Boundary of items per order	Add items until max line items per order (e.g., 100)	All lines added; scroll works; totals correct; performance acceptable.	No Warnings Setup for Upper Bound on item types exceeding maximum quantity	1
CO06	Items	Remove item	Lower bound – last item	Add 1 item, then remove it	Order list becomes empty, "No items added" message displayed; buttons requiring items (Kitchen / Proceed to pay) react per spec.	"No items added"	0
CO07	Order Type	Order type buttons	Lower bound – default type	Open New Order screen	One order type (e.g. **Takeout**) selected by default; others unselected.	One order type (e.g. **Takeout**) selected by default; others unselected.	0
CO08	Order Type	Switch order type	Boundary between types	Click Delivery → Pickup → Dinein → Takeout in sequence	Order data (items, total) stays same while type changes; only one type active at a time.	Order data (items, total) stays same while type changes; only one type active at a time.	0
CO09	Customer	Customer selector	Lower bound – Walk-in	Keep default "Walk-in Customer"	Warning requesting Customer information to be needed to be added for Walk in	Warning requesting Customer information to be needed to be added for Walk in	0
CO10	Customer	Customer selector	Upper bound – long name	Select customer with very long name (max length)	Name displays correctly or with ellipsis; layout not broken.	Name displays correctly or with ellipsis; layout not broken.	0
CO11	Delivery Time	Now / Schedule	Lower bound – Now	Keep **Now** selected	Order is treated as immediate; no scheduling fields required.	Order is treated as immediate; no scheduling fields required.	0
CO12	Delivery Time	Now / Schedule	Upper bound – schedule in past	Choose "Schedule for later" and set past time (if allowed UI)	System rejects with validation message; cannot save.	No scheduled in Past/ future appear as Scheduled later fields Malfunction	1
CO13	Delivery Time	Now / Schedule	Upper bound – schedule at far future	Schedule at maximum allowed date/time	Order accepted; stored as future order; no error.	No scheduled in Past/ future appear as Scheduled later fields Malfunction	1
CO14	Price	Item price	Lower bound – smallest allowed price	Item with price = minimum non-zero (e.g., 0.01)	Total uses correct rounding; can proceed to pay.	Total uses correct rounding; can proceed to pay.	0
CO15	Price	Order total	Upper bound – very large total	Use high-priced items + max quantity	Total shows correctly with currency, no numeric overflow or truncation.	Total shows correctly with currency, no numeric overflow or truncation.	0
CO16	Promo	Promo button	Lower bound – no promo	Leave Promo unused	Order total unchanged; no promo labels.	Order total unchanged; no promo labels.	0
CO17	Promo	Promo application	Upper bound – 100% discount	Apply 100% promo	Order total becomes 0, but still can be completed if business rules allow; tax/fees respected.	Order total becomes 0, but still can be completed if business rules allow; tax/fees respected.	0
CO18	Discount	Discount value	Negative / >100% boundary	Try to input negative discount or >100%	System rejects as invalid; shows validation message.	System rejects as invalid; shows validation message.	0
CO19	Tips	Tips amount	Lower bound – 0	No tip added	Total remains just subtotal + tax; order completes successfully.	Total remains just subtotal + tax; order completes successfully.	0
CO20	Tips	Tips amount	Upper bound – max tip	Add tip equal to max allowed (e.g., equal to subtotal)	Total correct; no overflow.	Total correct; no overflow.	0
CO21	Points	Points usage	Lower bound – 0 points	Select customer with 0 loyalty points	Points option disabled or message "No points available".	Points option disabled or message "No points available".	0
CO22	Points	Points usage	Upper bound – more points than order value	Redeem maximum available points	Redemption capped to order value; total not negative.	Redemption capped to order value; total not negative.	0
CO23	Skip Kitchen	Skip Kitchen checkbox	Boundary – on/off	Toggle checkbox on and off	When ON, order bypasses kitchen printing / routing; when OFF, normal kitchen flow triggered on Kitchen/Proceed to pay.	When ON, order bypasses kitchen printing / routing; when OFF, normal kitchen flow triggered on Kitchen/Proceed to pay.	0
CO24	Kitchen Button	Send to kitchen	Lower bound – 1 item	Add 1 item and tap **Kitchen**	Kitchen ticket printed/sent once; order stays in New/Unpaid state (per spec).	Kitchen ticket printed/sent once; order stays in New/Unpaid state (per spec).	0
CO25	Proceed to Pay	Payment trigger	Boundary – with valid order	Add valid items, then **Proceed to pay**	Navigates to payment screen with correct amount and order details.	Navigates to payment screen with correct amount and order details.	0
CO26	Proceed to Pay	Validation	Attempt with missing mandatory info	If customer is required for Delivery, choose Delivery but no customer, then Proceed to pay	System stops and shows "Customer required for Delivery" (or equivalent).	System stops and shows "Customer required for Delivery" (or equivalent).	0
CO27	Hold Bill	Hold action	Lower bound – normal order	Add 1 item, tap **Hold Bill**	Order saved as "Held"; disappears from New tab and appears under Hold/Hold Orders list.	Order saved as "Held"; disappears from New tab and appears under Hold/Hold Orders list.	0
CO28	Reset	Reset button	Boundary – existing items	Add multiple items, then **Reset**	All items, promos, discounts, tips, and points cleared; screen returns to initial empty state.	All items, promos, discounts, tips, and points cleared; screen returns to initial empty state.	0
CO29	Tabs	Navigation	Between New / Orders / Hold / Table / Request	Switch between tabs with existing unsaved order	Behaviour matches spec (either warn before leaving, auto-save as draft/hold, or discard). No data corruption.	Orders cannot be added as per Navigation to Table bookings	1
CO30	Categories	Menu categories row	Lower bound – 1 category	Only 1 category with items	Category tab visible and selected; items load correctly.	Category tab visible and selected; items load correctly.	0
CO31	Categories	Menu categories row	Upper bound – many categories	Configure many categories so row scrolls	UI allows horizontal scrolling or wrapping; selection switches items reliably.	UI allows horizontal scrolling or wrapping; selection switches items reliably.	0

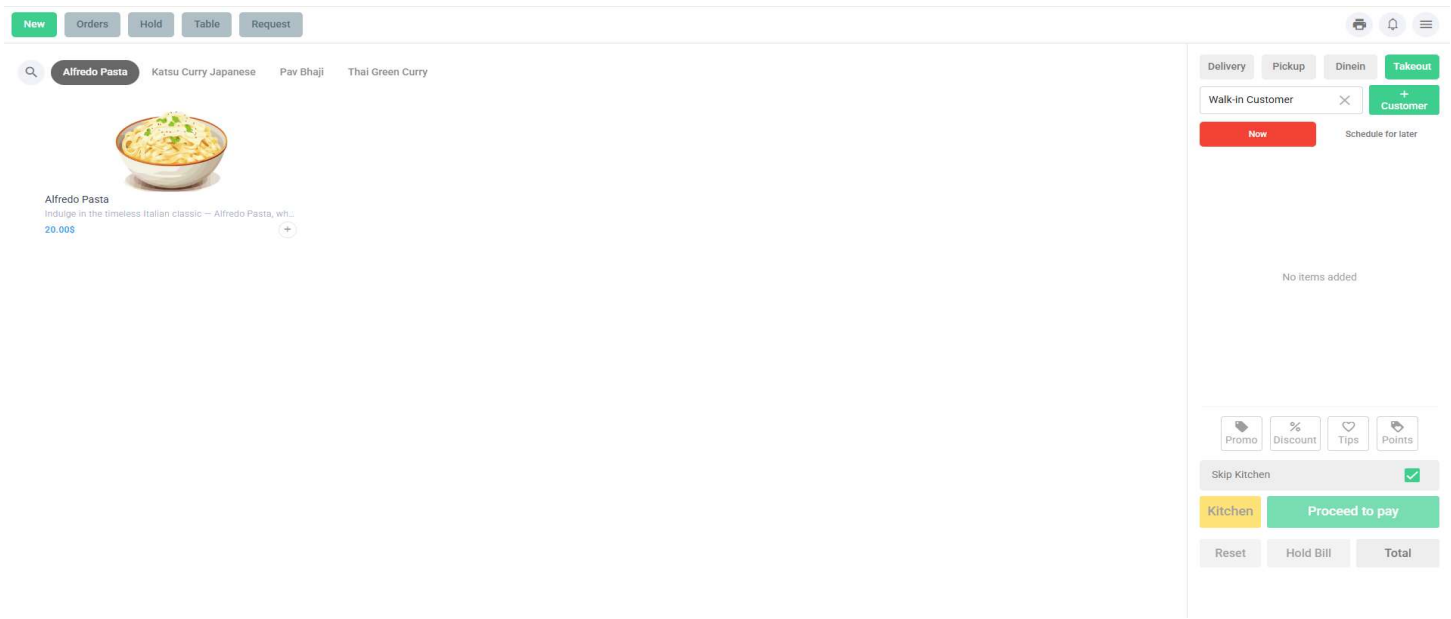
"Create an Order" Mockup



Object: Order placed
Functions/ Fields:
1) Items (Based on items created: Alfredo, Thai, Katsu, Pavbhaji),
2) Order Status (New, Orders (placed), Hold, Table, Request)
3) Delivery Mode (Delivery, Pickup, Dineln, Takeout)
4) Customer (Walkin, Existing)
5) Delivery Time (Scheduled Now, Later)
6) Discount (Promo, %, Tips, Points)
7) Kitchen (Skip/ In Kitchen List)
8) Payment Methods (Based on Payment Methods setup by Merchant/User)
9) Payment Status (Reset, hold, Pay in total "Total")

CreateOrder - State Transition

TC#	Field / Control	Current State	Test Data	Event / Trigger	Next State	Remarks / Issues
CO01	**Items**	Order Form	0 items	Do not add any item	Empty Form	0
CO02	**Items**	Order Form	0 item	Add 1 item (tap "+" on any item)	Form with 1 item	0
CO03	**Items**	Form with N items	Add another item	Add 1 more item	Form with N+1 items	0
CO04	**Items**	Form with N items	Remove 1 item	Tap "–" / remove on that item	Form with N-1 items	0
CO05	**Items**	Form with N items	Clear all items	Tap "Reset"	Empty Form	0
CO06	**Order Status**	Order Form – New	Valid order (items added)	Tap "Kitchen" or "Proceed to pay" and complete order	Orders (placed)	0
CO07	**Order Status**	Orders (placed)	Existing placed order	Tap "Hold Bill"	Hold	0
CO08	**Order Status**	Order Form – New	Table number selected	Tap "Table" tab with table chosen	Table	1
CO09	**Order Status**	Order Form – New / Table	Items present	Tap "Request"	Request	1
CO10	**Delivery Mode**	Order Form – Takeout (default)	—	Open new order	Takeout	0
CO11	**Delivery Mode**	Any mode	Select "Delivery"	Tap Delivery button	Delivery	0
CO12	**Delivery Mode**	Any mode	Select "Pickup"	Tap Pickup button	Pickup	0
CO13	**Delivery Mode**	Any mode	Select "DineIn"	Tap DineIn button	DineIn	0
CO14	**Delivery Mode**	Any mode	Select "Takeout"	Tap Takeout button	Takeout	0
CO15	**Customer**	Order Form	Walk-in Customer	Default when new order opened	Walk-in	0
CO16	**Customer**	Order Form	Existing customer in DB	Tap "+ Customer", search & select customer	Existing Customer selected	0
CO17	**Customer**	Existing Customer selected	Clear customer	Tap "X" on customer field	Walk-in	0
CO18	**Delivery Time**	Order Form	Now	Default when order opened	Now	0
CO19	**Delivery Time**	Order Form	Schedule for later time	Tap "Schedule for later", pick valid future time	Later (Scheduled)	1
CO20	**Delivery Time**	Order Form – Later	Remove schedule	Change back to "Now"	Now	1
CO21	**Discount / Charges**	Order Form	No discount/tips/points	Default	No Discount / No Tips / No Points	0
CO22	**Discount / Charges**	Order Form with total amount	Valid promo code	Tap "Promo", apply code	Discount Applied – Promo	0
CO23	**Discount / Charges**	Order Form with total amount	% discount value	Tap "Discount", enter %	Discount Applied – %	0
CO24	**Discount / Charges**	Order Form with total amount	Tip amount/value	Tap "Tips", enter amount/percentage	Tip Added	0
CO25	**Discount / Charges**	Order Form with loyalty points	Points to redeem	Tap "Points", redeem	Points Applied	0
CO26	**Discount / Charges**	Order Form with any discount/tip/points	—	Tap "Reset"	All Discounts/Tips/Points cleared	0
CO27	**Kitchen**	Order Form	"Skip Kitchen" checked	Default state	Skip Kitchen	0
CO28	**Kitchen**	Order Form	"Skip Kitchen" unchecked	User unticks checkbox	In Kitchen List	0
CO29	**Payment Methods**	Order Form – Pay pending	Multiple methods configured (e.g. Cash, Card, Wallet, Split)	Tap "Proceed to pay"	Payment Options displayed	0
CO30	**Payment Methods**	Payment Options displayed	Choose single method (e.g. Cash) and valid amount	Confirm payment	Paid (Single method)	0
CO31	**Payment Methods**	Payment Options displayed	Choose multiple methods with split amounts	Confirm payment	Paid (Split payment)	0
CO32	**Payment Methods**	Payment Options displayed	Cancel payment	Cancel / Back	Return to Order Form – unpaid	0
CO33	**Payment Status**	Order Form – unpaid	Items added	Tap "Total" / Proceed to pay and complete	Paid in full	0
CO34	**Payment Status**	Order Form – unpaid	Items added	Tap "Hold Bill"	Hold	0
CO35	**Payment Status**	Order on Hold	—	Open from Hold & proceed to pay	From Hold → Paid	0
CO36	**Payment Status**	Order Form – any	—	Tap "Reset"	Empty Form	0

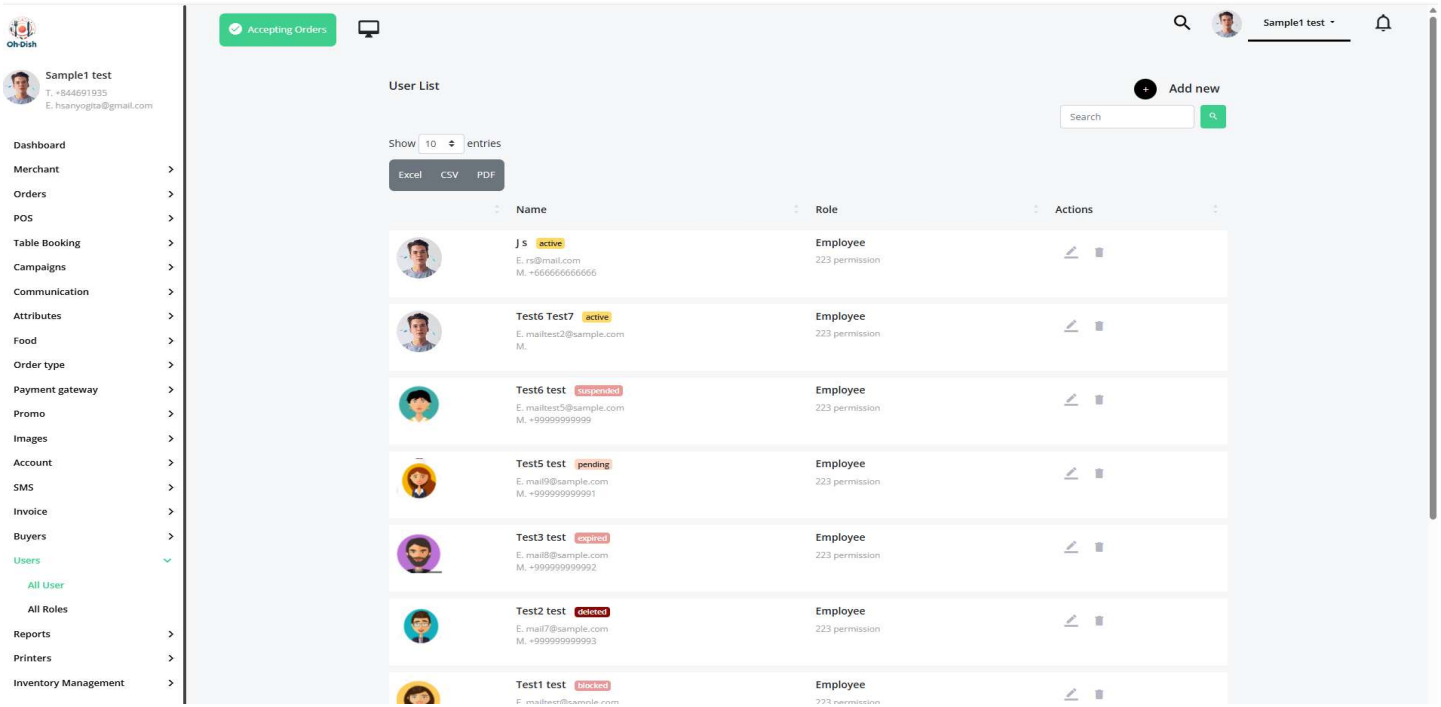
All User Page - Mockup



Data Field: (Sub-category)

1) Entries Filter (10, 25, 50, 100)

2) Search Function (partial name/ whole phrase/ single characters)

3) Output: (Excel, CSV, PDF)

3.1) Pagination (Per Page Enteries Total to display)

3.2) Name: (First name, Last name, Status, Email, Phone)

3.3) Role: (Permissions)

3.4) Actions: (Edit, Delete)

All User-BC					
TC#	**Area**	**Data Field / Control**	**Test Objective**	**Test Data / Setup**	**Expected Result**
UL01	User List	Number of Users	Lower bound – 0 records	System has **0 users** in DB	Grid shows “No data / No users found”, no rows, no JS errors, export buttons disabled or export empty file.
UL02	User List	Number of Users	Lower bound – 1 record	System has **1 user**	Exactly 1 row displayed, no pagination controls shown or pagination disabled.
UL03	User List	Number of Users	Page size boundary – exactly 10	System has **10 users**; “Show 10 entries”	10 rows displayed; **no** next page link.
UL04	User List	Number of Users	Page size boundary – 10 + 1	System has **11 users**; “Show 10 entries”	10 rows on page 1, 1 row on page 2; pagination controls visible and working.
UL05	User List	Number of Users	Upper bound – max supported users	Populate list with **max allowed records** (e.g., 10,000)	List loads within acceptable time, pagination works, no UI break or memory error.
UL06	Search	Search text	Lower bound – empty search	Leave Search box blank, press Enter / click icon	List shows default set (first page of all users); no filter applied.
UL07	Search	Search text	Lower bound – 1 character	Type “J” and search	Returns all users whose name / email / username contains “J”; case-handling as per spec.
UL08	Search	Search text	Upper bound – max length	Type **max allowed characters** (e.g., 255) and search	System accepts input, performs search; no truncation error / crash.
UL09	Search	Search text	Upper bound invalid – length + 1	Paste text **longer than max**	Field prevents extra characters OR shows validation message; search not executed with invalid length.
UL10	Search	Search text	Special characters boundary	Search using *@#%_'- mixed string	No crash or SQL / JS error; either matches correctly or shows “No results found”.
UL11	Search + Pagination	Combined boundary	Search result count = 0	Term that matches no users	Grid shows “No users found”; pagination hidden/disabled; export handles empty result.
UL12	Search + Pagination	Combined boundary	Search result count = exactly page size	Term that returns exactly 10 users	10 rows, no next-page; paging consistent with filtered set.
UL13	Show entries	Page size selector	Lower bound option	Change “Show entries” to **smallest** value (e.g., 10) with >10 users	Only that many rows shown; pagination updated accordingly.
UL14	Show entries	Page size selector	Upper bound option	Change “Show entries” to **largest** value (e.g., 100)	Up to 100 users listed; if fewer exist, all shown on a single page.
UL15	Status badge	Status values	Boundary – each allowed status	Have at least one user for each status: Active, Suspended, Pending, Expired, Deleted, Blocked	Correct badge text and color shown for each; no status renders as plain text or breaks layout.
UL16	Name column	Text length	Lower bound valid – 1 char name	User with first name = “J”, last name = “S”	Name column displays correctly without layout break.
UL17	Name column	Text length	Upper bound valid – max name length	User whose name length = max allowed	Name is shown or neatly truncated with tooltip / ellipsis; row height remains consistent.
UL18	Avatar	Image presence	Lower bound – no avatar	User without profile image	Default placeholder avatar is shown; no broken image icon.
UL19	Avatar	Image presence	Invalid / large avatar	Avatar URL invalid or huge file size	Graceful fallback to placeholder or handled error; page still loads.
UL20	Actions – Edit	First / last row boundary	Edit user in first and last row of page	Click pencil icon on **top row** and **bottom row**	Navigates to correct user’s edit page both times.
UL21	Actions – Delete	Boundary – confirmation	Delete user on first page and last page	Click trash icon, confirm deletion	Row removed, count and pagination updated; can’t access deleted user via edit.
UL22	Export (Excel/CSV/PDF)	Record count	Export with 0 users	No users in list (or filtered to zero) then click each export	System generates empty but valid file (or disables export) without errors.
UL23	Export (Excel/CSV/PDF)	Record count	Export with max users	Export when list has maximum allowed number of rows	File is generated successfully; size within limits; all rows present.
UL24	Role column	Text length	Upper bound – long role name	Role name at max length (e.g., “Senior Regional Sales Representative …”)	Column displays or truncates cleanly without overlapping other columns.
UL25	Device/viewport	Horizontal space	Boundary – narrow desktop width	Resize browser to minimum supported width	Table horizontally scrolls or adapts; no columns overlap, buttons remain clickable.

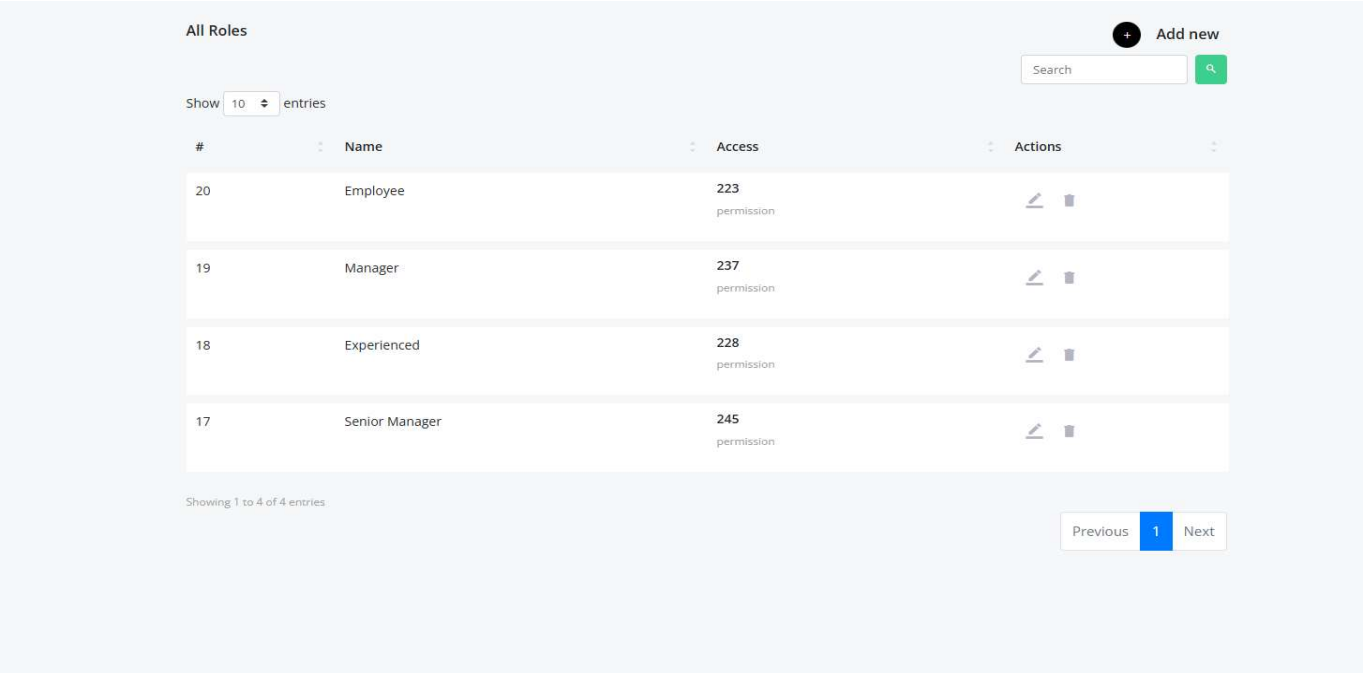
All Roles Page - Mockup



Data Field: (Sub-category)

1) Entries Filter (10, 25, 50, 100)

2) Search Function (partial name/ whole phrase/ single characters)

3.1) Pagination (Per Page Enteries Total to display)

3.2) Name: (Role name)

3.3) Permissions

3.4) Actions: (Edit, Delete)

All Role BC					
TC#	**Section**	**Data Field / Function**	**Test Objective**	**Test Data / Setup**	**Expected Result**
RD01	Roles List	Total Records	Lower Bound – 0 roles	System contains **0 roles**	Table displays "No data / No roles found". Pagination hidden. No UI errors.
RD02	Roles List	Total Records	Lower Bound – 1 role	System contains **1 role**	Only 1 row shown. No pagination.
RD03	Roles List	Total Records	Page size boundary (10 roles)	Exactly **10 roles** exist	All shown on page 1, pagination hidden.
RD04	Roles List	Total Records	Page size +1 (11 roles)	11 roles in DB	Page 1 shows 10, Page 2 shows 1. Pagination appears.
RD05	Roles List	Total Records	Upper Bound – max allowed (e.g., 5000)	Insert large number of roles	Table loads correctly, no performance crash, pagination works.
RD06	Role Name Column	Name length	Lower Bound – 1 character	Role = "A"	UI shows "A" correctly, no column break.
RD07	Role Name Column	Name length	Upper Bound – max allowed	Role Name = max length (e.g., 255 chars)	Displays properly or truncates with ellipsis, no overflow.
RD08	Role Name Column	Name length	Above max limit	Role name > allowed limit	Should reject in Add Role page; List page must still display safely (truncate/no break).
RD09	Access Count Column	Access permission number	Lower bound – 0 permissions	Role exists with **0 permissions assigned**	Shows "0 permission", no crash.
RD10	Access Count Column	Access permission number	Upper bound – very large count	Role with hundreds (or max allowed) permissions	List displays count correctly, no overflow.
RD11	Search	Input field	Lower Bound – empty search	Leave search blank	List resets to show all roles.
RD12	Search	Input field	1 character	Search = "M"	Filters roles starting with/containing M.
RD13	Search	Input field	Max length allowed	Paste long string (e.g., 255 chars)	Field allows input, returns no results or match. No errors.
RD14	Search	Special characters	Search "@#$%^&*()"	Should not break UI; show "no results".	No Results
RD15	Search + Pagination	Search result boundary = 0	Search non-existing term	Displays "No roles found". Pagination hidden.	No roles found
RD16	Search + Pagination	Search result = exact page size	Search returns exactly 10 items	No pagination.	No pagination.
RD17	Search + Pagination	Search result > page size	Search returns >10 items	Pagination enabled.	Pagination enabled.
RD18	Actions – Edit	First row boundary	Click edit on top row	Opens correct role edit page.	Opens correct role edit page.
RD19	Actions – Edit	Last row boundary	Click edit on last row	Opens correct role edit page.	Opens correct role edit page.
RD20	Actions – Delete	Confirmation boundary	Delete role from first page	Role successfully removed; table refreshes, pagination adjusts.	Role successfully removed; table refreshes, pagination adjusts.
RD21	Actions – Delete	Trying to delete last remaining role	Only 1 role exists	Must delete successfully; list shows "no roles" afterward.	Must delete successfully; list shows "no roles" afterward.
RD22	Actions – Delete	Attempt to delete a role assigned to active users	Role mapped to users	System should show validation error OR prevent deletion (business rule).	System should show validation error OR prevent deletion (business rule).
RD23	Pagination	Navigation	Lower bound – first page	"Previous" disabled or does nothing.	"Previous" disabled or does nothing.
RD24	Pagination	Navigation	Upper bound – last page	"Next" disabled or does nothing.	"Next" disabled or does nothing.
RD25	Pagination	Rapid navigation	Fast clicking Next/Previous repeatedly	No glitch, no duplicate records, no console errors.	No glitch, no duplicate records, no console errors.
RD26	Show Entries	Dropdown boundaries	Change to smallest page size	UI correctly limits rows.	UI correctly limits rows.
RD27	Show Entries	Dropdown boundaries	Change to largest page size	Shows all or max rows allowed on one page, no overflow.	Shows all or max rows allowed on one page, no overflow.
RD28	Add New Button	Function boundary	Click Add New with no roles selected	Opens Add Role page. No dependency on list content.	Opens Add Role page. No dependency on list content.
RD29	Column Sorting	Name column	Lower bound	Sort ascending	Alphabetical ordering correct.
RD30	Column Sorting	Access column	Numerical sort boundary	Sort ascending/descending	Permissions count sorted numerically, not alphabetically ("2" < "12" < "100").

Add Roles Page - Mockup

1) Role Permission

- Dashboard (Order Summary, Week Sales, Daily Statistics, Last 5 Orders, Popular Items, Sales Overview, Top Customers, Overview of Review)
- Orders (Order Management, Order Settings, Order Cancellation, Order Limit, Order Time Slot, Order Tracking)
- General (Settings (Store Hours, Taxes, SEO, Kitchen Workload), Location Management, Zone, Delivery Management, Time Reference Management, Search Mode, Logo & Signup, Phone Settings, Social Settings, Google Recaptcha, Map API Keys, Notification Settings, Orders Settings, Menu Options, Mobile Page, Order Limit, Banner, Pages, Menu)
- Product (Product, Product Bulk Import, Product Bulk Update, Product Review, Cancellation, Scheduled, Scheduled, All Orders)
- POS (Create Order, Order History)
- Customer (Customer, Customer Review, Customer Settings, Skills, Roles, Notes, Generate Table, Tablestate QR-Code Configuration)
- Campaigns (Loyalty Points, Suggested Items, Sports Based Free Item)
- Inventory (Inventory)
- Attributes (Size, Ingredients, Cooking Reference)
- Food (Category, Category Availability, Addon Category, Addon Items, Item, Bulk Import, Item Duplicate, Items Availability, Items Price, Items Addon, Items Attribute, Tax, Items Availability, Items Inventory, View Barcode, Items Promo, Items Gallery, Items SEO)
- Payment (Payment Method, Payment Settings, Payment Instructions, Payment Instructions, Direct, Direct Instructions)
- Payment Delivery (Cod Payments, Bank Deposit, Pay on Delivery)
- Promo (Coupon, Offers)
- Media (Media Library, Get Media Files, Get Media Files Selected, Upload Media Files, Delete Media Files)
- Account (Business, Subscription)
- Report (Order Report, Sales Report)
- Invoice (List, Invoice View, Upload Deposit, View PDF)
- Review (Review, Review Response, Order History, Print PDF, Review List, Email Subscribers)
- Users (All Users, All Roles)
- Reports (Sales Report, Daily Sales Report, Sales Summary, Sales Chart, Refund Report)
- Table (All Tables, All Areas)
- Inventory Management (Supplier)

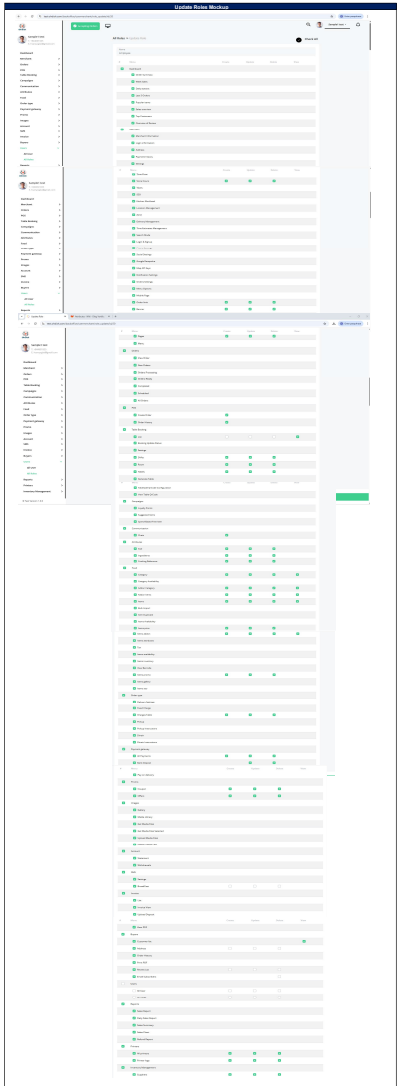
Update Roles Mockup



1) Role Permission

- Dashboard (Order Summary, Week Sales, Daily Shortlists, Last 5 Orders, Popular Items, Sales Snapshot, Top Customers, Overview of Reviews)
- Orders (Order Management, Order Details, Order Tracking, Order Cancellation, Order Refund, Order Edit, Order Notes, Order Tags)
- Customer (Settings (Store Hours, Tools, SEO, Kitchen Whiteboard, Location Management), Zone, Delivery Management, Time Exclusion Management, Sweet Meals, Logo & Signup, Phone Settings, Social Settings, Google Recaptcha, Map API Keys, Notifications Settings, Videos Settings, Menu Options, Website Page, Order Limit, Balance, Pages, Menu)
- Menu (Menu, Menu Items, Menu Item Variations, Menu Item Modifiers, Menu Item Modifier Groups, Menu Item Tags)
- POS (Cases, Video, Video Filters)
- Marketing (Marketing Campaigns, Marketing Agency, Verify Items, Tables, Customer Tables, Tablesite QR Code Configuration)
- Campaigns (Loyalty Points, Targeted Items, Spin&Scratch Free Item)
- Inventory (Inventory)
- Ingredients (Ingredients, Cooking Reference)
- Attributes (Attributes, Attribute Groups, Attribute Options, Attribute Sets, Item, Bulk Import, Item Specials, Menu Availability, Items Price, Items Addon, Items Attributes, Tax, Items Availability, Items Inventory, View Barcodes, Items Promo, Items Gallery, Items SEO)
- Payment (Payment Settings, Payout Charges, Charges Table, Prices, Pickup Instructions, Drive In, Drive In Instructions)
- Promotions (Coupons, Offers)
- Media (Media Library, Add Media Files, Get Media Files, Get Media Files Selected, Upload Media Files, Delete Media Files)
- Accounts (Reviews, Withdrawals)
- Reports (Reports, Reviews)
- Invoice (List, Invoice View, Upload Deposit, View PDF)
- Reports (Sales Summary, Sales Detail Reports, Print PDF, Receive List, Email, Subscribers)
- Reports (Item Sales Report)
- Reports (Sales Summary, Sales Detail Reports, Sales Summary, Sales Chart, Refund Report)
- Printers (All Printers, Printer Logs)
- Inventory Management (Inventory)

Update Roles Boundary Conditions						
TC#	Page	Data Field	Test Objective	Test Data	Expected Result	Expected Result value
UR01	Update Role	Description	Test for Lower Bound valid	None (blank – if optional)	Accept	Role Created
UR02	Update Role	Description	Test for Lower Bound Invalid	None (blank – if description is mandatory)	Reject	Role Creation failed with Warning
UR03	Update Role	Description	Test for Upper Bound valid	MaxLen(Description) chars	Accept	Role Created
UR04	Update Role	Description	Test for Upper Bound Invalid	MaxLen(Description) + 1 chars	Reject	Role Creation failed with Warning
UR05	Update Role	Description	Test for Nominal	Typical sentence (20–100 chars)	Accept	Role Created
UR06	Update Role	Permissions	Test for Lower Bound Invalid – none	No module / permission checkbox selected	Reject	Role Creation failed with Warning
UR07	Update Role	Permissions	Test for Lower Bound valid – minimum	Exactly 1 lowest-level permission checked	Accept	Role Created
UR08	Update Role	Permissions	Test for Upper Bound valid – all selected	“Check All” selected for all modules	Accept	Role Created with all permissions
UR09	Update Role	Permissions	Test for Upper Bound valid – many selected	All permissions for one module, none for others	Accept	Role Created, permissions limited to one module
UR10	Update Role	Permissions	Test for mixed selection	Random mix of Create/Update/Delete/View across modules	Accept	Role Created, permissions saved correctly
UR11	Update Role	Permissions	Test parent/child relationship – parent only	Parent module checkbox checked, children unchecked (if supported)	As per spec (auto-select children or reject)	Parent/child rule enforced correctly
UR12	Update Role	Permissions	Test parent/child relationship – child only	Only child menu item checked, parent unchecked	Accept / Auto-check parent (per spec)	Parent/child rule enforced correctly
UR13	Update Role	Check All	Test global “Check All” lower bound	Click “Check All” once (select all)	Accept	All permission checkboxes are selected
UR14	Update Role	Check All	Test global “Check All” toggle	Click “Check All” twice (select + deselect all)	Accept	All permission checkboxes deselected
UR15	Update Role	Status (if any)	Test for Lower Bound valid	Status = Active	Accept	Role Created – Active
UR16	Update Role	Status (if any)	Test for Upper Bound valid	Status = Inactive / Disabled	Accept	Role Created – Inactive
UR17	Update Role	Save action	Test for mandatory fields combination	Blank Role Name + at least one permission	Reject	Role Creation failed with Warning
UR18	Update Role	Save action	Test for mandatory fields combination	Valid Role Name + no permissions	Reject	Role Creation failed with Warning
UR19	Update Role	Save action	Test for nominal successful save	Valid Role Name + Nominal Description + some permissions	Accept	Role Created

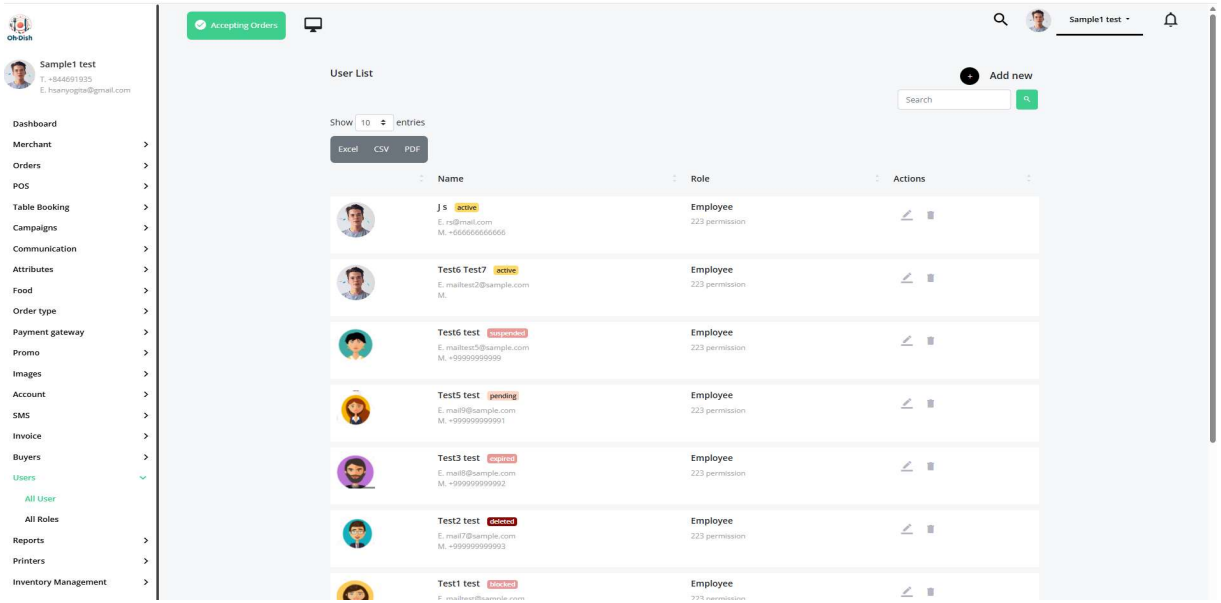
All User Mockup



Data Field: (Sub-category)

1) Entries Filter (10, 25, 50, 100)

2) Search Function (partial name/ whole phrase/ single characters)

3) Output: (Excel, CSV, PDF)

3.1) Pagination (Per Page Enteries Total to display)

3.2) Name: (First name, Last name, Status, Email, Phone)

3.3) Role: (Permissions)

3.4) Actions: (Edit, Delete)

AllUser-StateTransitions								
TC#	Page	Area / Section	Field / Control	Current State	Test Data	Event / Trigger	Next State	Expected Result (detail)
UL01	All Users – List	User List	Number of Users	User List page loaded	0 users	Filtering Results	Error state Page	“No data / No users found”
UL02	All Users – List	User List	Number of Users	User List page loaded	1 user	Filtering Results	1 Expected result Page	Exactly 1 row displayed
UL03	All Users – List	User List	Number of Users	User List page loaded	10 users	Filtering Results	10 Expected result Page	10 rows displayed; no next page link.
UL05	All Users – List	User List	Number of Users	User List page loaded	11 users	Filtering Results	10 Expected result Page + Next Page with 1 Additional attempt	10 rows displayed; 1 next page link.
UL06	All Users – List	Search	Search text	User List page loaded	Leave Search box blank, press Enter / click icon	User performs action / enters data as per Test Data: Leave Search box blank, press Enter / click icon	List navigated / paginated as per expected result	List shows default set (first page of all users); no filter applied.
UL07	All Users – List	Search	Search text	User List page loaded	Type “J” and search	User performs action / enters data as per Test Data: Type “J” and search	See Expected Result	Returns all users whose name / email / username contains “J”; case-handling as per spec.
UL08	All Users – List	Search	Search text	User List page loaded	Type max allowed characters (e.g., 255) and search	User performs action / enters data as per Test Data: Type max allowed characters (e.g., 255) and search	Operation succeeds (record saved or list shown as expected)	System accepts input, performs search; no truncation error / crash.
UL09	All Users – List	Search	Search text	User List page loaded	Paste text longer than max	User performs action / enters data as per Test Data: Paste text longer than max	See Expected Result	Field prevents extra characters OR shows validation message; search not executed with invalid length.
UL10	All Users – List	Search	Search text	User List page loaded	Search using *@#%_*- mixed string	User performs action / enters data as per Test Data: Search using *@#%_*- mixed string	See Expected Result	No crash or SQL / JS error; either matches correctly or shows “No results found”.
UL11	All Users – List	Search + Pagination	Combined boundary	User List page loaded	Term that matches no users	User performs action / enters data as per Test Data: Term that matches no users	List navigated / paginated as per expected result	Grid shows “No users found”; pagination hidden/disabled; export handles empty result.
UL12	All Users – List	Search + Pagination	Combined boundary	User List page loaded	Term that returns exactly 10 users	User performs action / enters data as per Test Data: Term that returns exactly 10 users	List navigated / paginated as per expected result	10 rows, no next-page; paging consistent with filtered set.
UL13	All Users – List	Show entries	Page size selector	User List page loaded	Change “Show entries” to smallest value (e.g., 10) with >10 users	User performs action / enters data as per Test Data: Change “Show entries” to smallest value (e.g., 10) with >10 users	Operation succeeds (record saved or list shown as expected)	Only that many rows shown; pagination updated accordingly.
UL14	All Users – List	Show entries	Page size selector	User List page loaded	Change “Show entries” to largest value (e.g., 100)	User performs action / enters data as per Test Data: Change “Show entries” to largest value (e.g., 100)	List navigated / paginated as per expected result	Up to 100 users listed; if fewer exist, all shown on a single page.
UL15	All Users – List	Status badge	Status values	User List page loaded	Have at least one user for each status: Active, Suspended, Pending, Expired, Deleted, Blocked	User performs action / enters data as per Test Data: Have at least one user for each status: Active, Suspended, Pending, Expired, Deleted, Blocked	See Expected Result	Correct badge text and color shown for each; no status renders as plain text or breaks layout.
UL16	All Users – List	Name column	Text length	User List page loaded	User with first name = “J”, last name = “S”	User performs action / enters data as per Test Data: User with first name = “J”, last name = “S”	See Expected Result	Name column displays correctly without layout break.
UL17	All Users – List	Name column	Text length	User List page loaded	User whose name length = max allowed	User performs action / enters data as per Test Data: User whose name length = max allowed	See Expected Result	Name is shown or neatly truncated with tooltip / ellipsis; row height remains consistent.
UL18	All Users – List	Avatar	Image presence	User List page loaded	User without profile image	User performs action / enters data as per Test Data: User without profile image	See Expected Result	Default placeholder avatar is shown; no broken image icon.
UL19	All Users – List	Avatar	Image presence	User List page loaded	Avatar URL invalid or huge file size	User performs action / enters data as per Test Data: Avatar URL invalid or huge file size	List navigated / paginated as per expected result	Graceful fallback to placeholder or handled error; page still loads.
UL20	All Users – List	Actions – Edit	First / last row boundary	User List page loaded	Click pencil icon on top row and bottom row	User performs action / enters data as per Test Data: Click pencil icon on top row and bottom row	List navigated / paginated as per expected result	Navigates to correct user’s edit page both times.
UL21	All Users – List	Actions – Delete	Boundary – confirmation	User List page loaded	Click trash icon, confirm deletion	User performs action / enters data as per Test Data: Click trash icon, confirm deletion	Operation succeeds (record saved or list shown as expected)	Row removed, count and pagination updated; can’t access deleted user via edit.
UL22	All Users – List	Export (Excel/CSV/PDF)	Record count	User List page loaded	No users in list (or filtered to zero) then click each export	User performs action / enters data as per Test Data: No users in list (or filtered to zero) then click each export	See Expected Result	System generates empty but valid file (or disables export) without errors.
UL23	All Users – List	Export (Excel/CSV/PDF)	Record count	User List page loaded	Export when list has maximum allowed number of rows	User performs action / enters data as per Test Data: Export when list has maximum allowed number of rows	See Expected Result	File is generated successfully; size within limits; all rows present.
UL24	All Users – List	Role column	Text length	User List page loaded	Role name at max length (e.g., “Senior Regional Sales Representative …”)	User performs action / enters data as per Test Data: Role name at max length (e.g., “Senior Regional Sales Representative …”)	See Expected Result	Column displays or truncates cleanly without overlapping other columns.
UL25	All Users – List	Device/viewport	Horizontal space	User List page loaded	Resize browser to minimum supported width	User performs action / enters data as per Test Data: Resize browser to minimum supported width	See Expected Result	Table horizontally scrolls or adapts; no columns overlap, buttons remain clickable.

AllUser-DecisionTable							
Rule (TC#)	**Page**	**Area / Section**	**Field**	**Condition (from Test Objective)**	**Input / Setup (from Test Data)**	**Expected Outcome Category**	**Detailed Expected Result**
UL01	All Users – List	User List	Number of Users	Lower bound – 0 records	System has 0 users in DB	Reject / Do not proceed	Grid shows “No data / No users found”, no rows, no JS errors, export buttons disabled or export empty file.
UL02	All Users – List	User List	Number of Users	Lower bound – 1 record	System has 1 user	Navigate / Paginate	Exactly 1 row displayed, no pagination controls shown or pagination disabled.
UL03	All Users – List	User List	Number of Users	Page size boundary – exactly 10	System has 10 users; “Show 10 entries”	Navigate / Paginate	10 rows displayed; no next page link.
UL04	All Users – List	User List	Number of Users	Page size boundary – 10 + 1	System has 11 users; “Show 10 entries”	Navigate / Paginate	10 rows on page 1, 1 row on page 2; pagination controls visible and working.
UL05	All Users – List	User List	Number of Users	Upper bound – max supported users	Populate list with max allowed records (e.g., 10,000)	Accept / Proceed	List loads within acceptable time, pagination works, no UI break or memory error.
UL06	All Users – List	Search	Search text	Lower bound – empty search	Leave Search box blank, press Enter / click icon	Navigate / Paginate	List shows default set (first page of all users); no filter applied.
UL07	All Users – List	Search	Search text	Lower bound – 1 character	Type “J” and search	Other	Returns all users whose name / email / username contains “J”; case-handling as per spec.
UL08	All Users – List	Search	Search text	Upper bound – max length	Type max allowed characters (e.g., 255) and search	Accept / Proceed	System accepts input, performs search; no truncation error / crash.
UL09	All Users – List	Search	Search text	Upper bound invalid – length + 1	Paste text longer than max	Other	Field prevents extra characters OR shows validation message; search not executed with invalid length.
UL10	All Users – List	Search	Search text	Special characters boundary	Search using *@#%_'- mixed string	Other	No crash or SQL / JS error; either matches correctly or shows “No results found”.
UL11	All Users – List	Search + Pagination	Combined boundary	Search result count = 0	Term that matches no users	Navigate / Paginate	Grid shows “No users found”; pagination hidden/disabled; export handles empty result.
UL12	All Users – List	Search + Pagination	Combined boundary	Search result count = exactly page size	Term that returns exactly 10 users	Navigate / Paginate	10 rows, no next-page; paging consistent with filtered set.
UL13	All Users – List	Show entries	Page size selector	Lower bound option	Change “Show entries” to smallest value (e.g., 10) with >10 users	Accept / Proceed	Only that many rows shown; pagination updated accordingly.
UL14	All Users – List	Show entries	Page size selector	Upper bound option	Change “Show entries” to largest value (e.g., 100)	Navigate / Paginate	Up to 100 users listed; if fewer exist, all shown on a single page.
UL15	All Users – List	Status badge	Status values	Boundary – each allowed status	Have at least one user for each status: Active, Suspended, Pending, Expired, Deleted, Blocked	Other	Correct badge text and color shown for each; no status renders as plain text or breaks layout.
UL16	All Users – List	Name column	Text length	Lower bound valid – 1 char name	User with first name = “J”, last name = “S”	Other	Name column displays correctly without layout break.
UL17	All Users – List	Name column	Text length	Upper bound valid – max name length	User whose name length = max allowed	Other	Name is shown or neatly truncated with tooltip / ellipsis; row height remains consistent.
UL18	All Users – List	Avatar	Image presence	Lower bound – no avatar	User without profile image	Other	Default placeholder avatar is shown; no broken image icon.
UL19	All Users – List	Avatar	Image presence	Invalid / large avatar	Avatar URL invalid or huge file size	Navigate / Paginate	Graceful fallback to placeholder or handled error; page still loads.
UL20	All Users – List	Actions – Edit	First / last row boundary	Edit user in first and last row of page	Click pencil icon on top row and bottom row	Navigate / Paginate	Navigates to correct user’s edit page both times.
UL21	All Users – List	Actions – Delete	Boundary – confirmation	Delete user on first page and last page	Click trash icon, confirm deletion	Accept / Proceed	Row removed, count and pagination updated; can’t access deleted user via edit.
UL22	All Users – List	Export (Excel/CSV/PDF)	Record count	Export with 0 users	No users in list (or filtered to zero) then click each export	Other	System generates empty but valid file (or disables export) without errors.
UL23	All Users – List	Export (Excel/CSV/PDF)	Record count	Export with max users	Export when list has maximum allowed number of rows	Other	File is generated successfully; size within limits; all rows present.
UL24	All Users – List	Role column	Text length	Upper bound – long role name	Role name at max length (e.g., “Senior Regional Sales Representative …”)	Other	Column displays or truncates cleanly without overlapping other columns.
UL25	All Users – List	Device/viewport	Horizontal space	Boundary – narrow desktop width	Resize browser to minimum supported width	Other	Table horizontally scrolls or adapts; no columns overlap, buttons remain clickable.

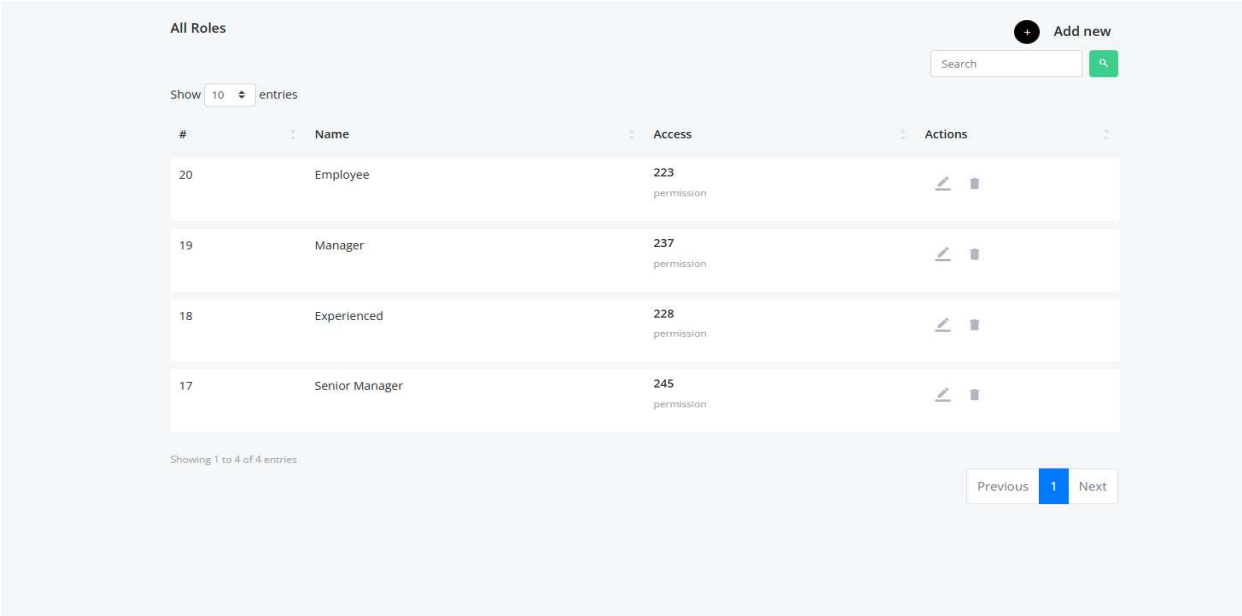
AllRoles-Mockup



Data Field: (Sub-category)

1) Entries Filter (10, 25, 50, 100)

2) Search Function (partial name/ whole phrase/ single characters)

3.1) Pagination (Per Page Enteries Total to display)

3.2) Name: (Role name)

3.3) Permissions

3.4) Actions: (Edit, Delete)

AllRole-StateTransitions								
TC#	Page	Area / Section	Field / Control	Current State	Event / Trigger	Next State	Outcome Category	Expected Result (detail)
RD01	All Roles – List	Roles List	Total Records	Role List page loaded	User performs action / enters data as per Test Data: System contains 0 roles	Validation / error state shown; data not committed	Validation / Error	Table displays "No data / No roles found". Pagination hidden. No UI errors.
RD02	All Roles – List	Roles List	Total Records	Role List page loaded	User performs action / enters data as per Test Data: System contains 1 role	List navigated / paginated as per expected result	Navigation / Pagination	Only 1 row shown. No pagination.
RD03	All Roles – List	Roles List	Total Records	Role List page loaded	User performs action / enters data as per Test Data: Exactly 10 roles exist	List navigated / paginated as per expected result	Navigation / Pagination	All shown on page 1, pagination hidden.
RD04	All Roles – List	Roles List	Total Records	Role List page loaded	User performs action / enters data as per Test Data: 11 roles in DB	List navigated / paginated as per expected result	Navigation / Pagination	Page 1 shows 10, Page 2 shows 1. Pagination appears.
RD05	All Roles – List	Roles List	Total Records	Role List page loaded	User performs action / enters data as per Test Data: Insert large number of roles	List navigated / paginated as per expected result	Navigation / Pagination	Table loads correctly, no performance crash, pagination works.
RD06	All Roles – List	Role Name Column	Name length	Role List page loaded	User performs action / enters data as per Test Data: Role = "A"	See Expected Result	Other	UI shows "A" correctly, no column break.
RD07	All Roles – List	Role Name Column	Name length	Role List page loaded	User performs action / enters data as per Test Data: Role Name = max length (e.g., 255 chars)	See Expected Result	Other	Displays properly or truncates with ellipsis, no overflow.
RD08	All Roles – List	Role Name Column	Name length	Role List page loaded	User performs action / enters data as per Test Data: Role name > allowed limit	Validation / error state shown; data not committed	Validation / Error	Should reject in Add Role page; List page must still display safely (truncate/no break).
RD09	All Roles – List	Access Count Column	Access permission number	Role List page loaded	User performs action / enters data as per Test Data: Role exists with 0 permissions assigned	See Expected Result	Other	Shows "0 permission", no crash.
RD10	All Roles – List	Access Count Column	Access permission number	Role List page loaded	User performs action / enters data as per Test Data: Role with hundreds (or max allowed) permissions	See Expected Result	Other	List displays count correctly, no overflow.
RD11	All Roles – List	Search	Input field	Role List page loaded	User performs action / enters data as per Test Data: Leave search blank	See Expected Result	Other	List resets to show all roles.
RD12	All Roles – List	Search	Input field	Role List page loaded	User performs action / enters data as per Test Data: Search = "M"	See Expected Result	Other	Filters roles starting with/containing M.
RD13	All Roles – List	Search	Input field	Role List page loaded	User performs action / enters data as per Test Data: Paste long string (e.g., 255 chars)	See Expected Result	Other	Field allows input, returns no results or match. No errors.
RD14	All Roles – List	Search	Special characters	Role List page loaded	User performs action / enters data as per Test Data: Should not break UI; show "no results".	See Expected Result	Other	
RD15	All Roles – List	Search + Pagination	Search result boundary = 0	Role List page loaded	User performs action / enters data as per Test Data: Displays "No roles found". Pagination hidden.	See Expected Result	Other	
RD16	All Roles – List	Search + Pagination	Search result = exact page size	Role List page loaded	User performs action / enters data as per Test Data: No pagination.	See Expected Result	Other	
RD17	All Roles – List	Search + Pagination	Search result > page size	Role List page loaded	User performs action / enters data as per Test Data: Pagination enabled.	See Expected Result	Other	
RD18	All Roles – List	Actions – Edit	First row boundary	Role List page loaded	User performs action / enters data as per Test Data: Opens correct role edit page.	See Expected Result	Other	
RD19	All Roles – List	Actions – Edit	Last row boundary	Role List page loaded	User performs action / enters data as per Test Data: Opens correct role edit page.	See Expected Result	Other	
RD20	All Roles – List	Actions – Delete	Confirmation boundary	Role List page loaded	User performs action / enters data as per Test Data: Role successfully removed; table refreshes, pagination adjusts.	See Expected Result	Other	
RD21	All Roles – List	Actions – Delete	Trying to delete last remaining role	Role List page loaded	User performs action / enters data as per Test Data: Must delete successfully; list shows "no roles" afterward.	See Expected Result	Other	
RD22	All Roles – List	Actions – Delete	Attempt to delete a role assigned to active users	Role List page loaded	User performs action / enters data as per Test Data: System should show validation error OR prevent deletion (business rule).	See Expected Result	Other	
RD23	All Roles – List	Pagination	Navigation	Role List page loaded	User performs action / enters data as per Test Data: "Previous" disabled or does nothing.	See Expected Result	Other	
RD24	All Roles – List	Pagination	Navigation	Role List page loaded	User performs action / enters data as per Test Data: "Next" disabled or does nothing.	See Expected Result	Other	
RD25	All Roles – List	Pagination	Rapid navigation	Role List page loaded	User performs action / enters data as per Test Data: No glitch, no duplicate records, no console errors.	See Expected Result	Other	
RD26	All Roles – List	Show Entries	Dropdown boundaries	Role List page loaded	User performs action / enters data as per Test Data: UI correctly limits rows.	See Expected Result	Other	
RD27	All Roles – List	Show Entries	Dropdown boundaries	Role List page loaded	User performs action / enters data as per Test Data: Shows all or max rows allowed on one page, no overflow.	See Expected Result	Other	
RD28	All Roles – List	Add New Button	Function boundary	Role List page loaded	User performs action / enters data as per Test Data: Opens Add Role page. No dependency on list content.	See Expected Result	Other	
RD29	All Roles – List	Column Sorting	Name column	Role List page loaded	User performs action / enters data as per Test Data: Sort ascending	See Expected Result	Other	Alphabetical ordering correct.
RD30	All Roles – List	Column Sorting	Access column	Role List page loaded	User performs action / enters data as per Test Data: Sort ascending/descending	See Expected Result	Other	Permissions count sorted numerically, not alphabetically ("2" < "12" < "100").

All Roles List Page Decision Table

TC#	Page	Area / Section	Field	Condition (from Test Objective)	Input / Setup (from Test Data)	Expected Outcome Category	Detailed Expected Result
RD01	All Roles – List	Roles List	Total Records	Lower Bound – 0 roles	System contains 0 roles	Reject / Do not proceed	Table displays “No data / No roles found”. Pagination hidden. No UI errors.
RD02	All Roles – List	Roles List	Total Records	Lower Bound – 1 role	System contains 1 role	Navigate / Paginate	Only 1 row shown. No pagination.
RD03	All Roles – List	Roles List	Total Records	Page size boundary (10 roles)	Exactly 10 roles exist	Navigate / Paginate	All shown on page 1, pagination hidden.
RD04	All Roles – List	Roles List	Total Records	Page size +1 (11 roles)	11 roles in DB	Navigate / Paginate	Page 1 shows 10, Page 2 shows 1. Pagination appears.
RD05	All Roles – List	Roles List	Total Records	Upper Bound – max allowed (e.g., 5000)	Insert large number of roles	Navigate / Paginate	Table loads correctly, no performance crash, pagination works.
RD06	All Roles – List	Role Name Column	Name length	Lower Bound – 1 character	Role = “A”	Other	UI shows “A” correctly, no column break.
RD07	All Roles – List	Role Name Column	Name length	Upper Bound – max allowed	Role Name = max length (e.g., 255 chars)	Other	Displays properly or truncates with ellipsis, no overflow.
RD08	All Roles – List	Role Name Column	Name length	Above max limit	Role name > allowed limit	Reject / Do not proceed	Should reject in Add Role page; List page must still display safely (truncate/no break).
RD09	All Roles – List	Access Count Column	Access permissio	Lower bound – 0 permissions	Role exists with 0 permissions assigned	Other	Shows “0 permission”, no crash.
RD10	All Roles – List	Access Count Column	Access permissio	Upper bound – very large count	Role with hundreds (or max allowed) permissions	Other	List displays count correctly, no overflow.
RD11	All Roles – List	Search	Input field	Lower Bound – empty search	Leave search blank	Other	List resets to show all roles.
RD12	All Roles – List	Search	Input field	1 character	Search = “M”	Other	Filters roles starting with/containing M.
RD13	All Roles – List	Search	Input field	Max length allowed	Paste long string (e.g., 255 chars)	Other	Field allows input, returns no results or match. No errors.
RD14	All Roles – List	Search	Special character	Search “@#$%^&*()”	Should not break UI; show “no results”.	Other	0
RD15	All Roles – List	Search + Pagination	Search result	Search non-existing term	Displays “No roles found”. Pagination hidden.	Other	0
RD16	All Roles – List	Search + Pagination	Search result =	Search returns exactly 10 items	No pagination.	Other	0
RD17	All Roles – List	Search + Pagination	Search results	Search returns >10 items	Pagination enabled.	Other	0
RD18	All Roles – List	Actions – Edit	First row boundary	Click edit on top row	Opens correct role edit page.	Other	0
RD19	All Roles – List	Actions – Edit	Last row boundary	Click edit on last row	Opens correct role edit page.	Other	0
RD20	All Roles – List	Actions – Delete	Confirmation	Delete role from first page	Role successfully removed; table refreshes, pagination adjusts.	Other	0
RD21	All Roles – List	Actions – Delete	Trying to delete last	Only 1 role exists	Must delete successfully; list shows “no roles” afterward.	Other	0
RD22	All Roles – List	Actions – Delete	Attempt to delete	Role mapped to users	System should show validation error OR prevent deletion (business rule).	Other	0
RD23	All Roles – List	Pagination	Navigation	Lower bound – first page	“Previous” disabled or does nothing.	Other	0
RD24	All Roles – List	Pagination	Navigation	Upper bound – last page	“Next” disabled or does nothing.	Other	0
RD25	All Roles – List	Pagination	Rapid navigation	Fast clicking Next/Previous repeatedly	No glitch, no duplicate records, no console errors.	Other	0
RD26	All Roles – List	Show Entries	Dropdown	Change to smallest page size	UI correctly limits rows.	Other	0
RD27	All Roles – List	Show Entries	Dropdown	Change to largest page size	Shows all or max rows allowed on one page, no overflow.	Other	0
RD28	All Roles – List	Add New Button	Function boundary	Click Add New with no roles selected	Opens Add Role page. No dependency on list content.	Other	0
RD29	All Roles – List	Column Sorting	Name column	Lower bound	Sort ascending	Other	Alphabetical ordering correct.
RD30	All Roles – List	Column Sorting	Access column	Numerical sort boundary	Sort ascending/descending	Other	Permissions count sorted numerically, not alphabetically (“2” < “12” < “100”).

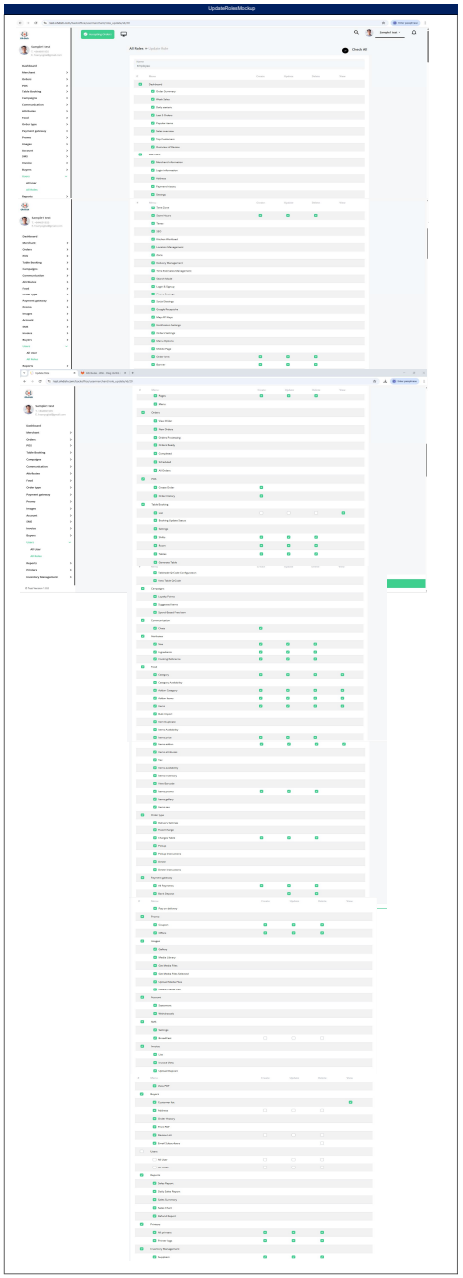
AR17	Add Role	Add Role	Save action	Test for mandatory fields combination	Blank Role Name + at least one permission	Reject / Do not proceed	Role Creation failed with Warning
AR18	Add Role	Add Role	Save action	Test for mandatory fields combination	Valid Role Name + no permissions	Reject / Do not proceed	Role Creation failed with Warning
AR19	Add Role	Add Role	Save action	Test for nominal successful save	Valid Role Name + Nominal Description + some permissions	Accept / Proceed	Role Created

UpdateRolesMockup



UpdateRoles-StateTransitions								
TC#	Page	Area / Section	Field / Control	Current State	Event / Trigger	Next State	Outcome Category	Expected Result (detail)
UR01	Update Role	Update Role	Description	Update Role form opened for existing role	User performs action / enters data as per Test Data: None (blank – if optional)	Operation succeeds (record saved or list shown as expected)	Successful	Role Created
UR02	Update Role	Update Role	Description	Update Role form opened for existing role	User performs action / enters data as per Test Data: None (blank – if description is mandatory)	Validation / error state shown; data not committed	Validation / Error	Role Creation failed with Warning
UR03	Update Role	Update Role	Description	Update Role form opened for existing role	User performs action / enters data as per Test Data: MaxLen(Description) chars	Operation succeeds (record saved or list shown as expected)	Successful	Role Created
UR04	Update Role	Update Role	Description	Update Role form opened for existing role	User performs action / enters data as per Test Data: MaxLen(Description) + 1 chars	Validation / error state shown; data not committed	Validation / Error	Role Creation failed with Warning
UR05	Update Role	Update Role	Description	Update Role form opened for existing role	User performs action / enters data as per Test Data: Typical sentence (20–100 chars)	Operation succeeds (record saved or list shown as expected)	Successful	Role Created
UR06	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: No module / permission checkbox selected	Validation / error state shown; data not committed	Validation / Error	Role Creation failed with Warning
UR07	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: Exactly 1 lowest-level permission checked	Operation succeeds (record saved or list shown as expected)	Successful	Role Created
UR08	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: “Check All” selected for all modules	Operation succeeds (record saved or list shown as expected)	Successful	Role Created with all permissions
UR09	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: All permissions for one module, none for others	Operation succeeds (record saved or list shown as expected)	Successful	Role Created, permissions limited to one module
UR10	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: Random mix of Create/Update/Delete/View across modules	Operation succeeds (record saved or list shown as expected)	Successful	Role Created, permissions saved correctly
UR11	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: Parent module checkbox checked, children unchecked (if supported)	Validation / error state shown; data not committed	Validation / Error	Parent/child rule enforced correctly
UR12	Update Role	Update Role	Permissions	Update Role form opened for existing role	User performs action / enters data as per Test Data: Only child menu item checked, parent unchecked	Operation succeeds (record saved or list shown as expected)	Successful	Parent/child rule enforced correctly
UR13	Update Role	Update Role	Check All	Update Role form opened for existing role	User performs action / enters data as per Test Data: Click “Check All” once (select all)	Operation succeeds (record saved or list shown as expected)	Successful	All permission checkboxes are selected
UR14	Update Role	Update Role	Check All	Update Role form opened for existing role	User performs action / enters data as per Test Data: Click “Check All” twice (select + deselect all)	Operation succeeds (record saved or list shown as expected)	Successful	All permission checkboxes deselected
UR15	Update Role	Update Role	Status (if any)	Update Role form opened for existing role	User performs action / enters data as per Test Data: Status = Active	Operation succeeds (record saved or list shown as expected)	Successful	Role Created – Active
UR16	Update Role	Update Role	Status (if any)	Update Role form opened for existing role	User performs action / enters data as per Test Data: Status = Inactive / Disabled	Operation succeeds (record saved or list shown as expected)	Successful	Role Created – Inactive
UR17	Update Role	Update Role	Save action	Update Role form opened for existing role	User performs action / enters data as per Test Data: Blank Role Name + at least one permission	Validation / error state shown; data not committed	Validation / Error	Role Creation failed with Warning
UR18	Update Role	Update Role	Save action	Update Role form opened for existing role	User performs action / enters data as per Test Data: Valid Role Name + no permissions	Validation / error state shown; data not committed	Validation / Error	Role Creation failed with Warning
UR19	Update Role	Update Role	Save action	Update Role form opened for existing role	User performs action / enters data as per Test Data: Valid Role Name + Nominal Description + some permissions	Operation succeeds (record saved or list shown as expected)	Successful	Role Created

UpdateRoles-DecisionTable

Rule (TC#)	Page	Area / Section	Field	Condition (from Test Objective)	Input / Setup (from Test Data)	Expected Outcome Category	Detailed Expected Result
UR01	Update Role	Update Role	Description	Test for Lower Bound valid	None (blank – if optional)	Accept / Proceed	Role Created
UR02	Update Role	Update Role	Description	Test for Lower Bound Invalid	None (blank – if description is mandatory)	Reject / Do not proceed	Role Creation failed with Warning
UR03	Update Role	Update Role	Description	Test for Upper Bound valid	MaxLen(Description) chars	Accept / Proceed	Role Created
UR04	Update Role	Update Role	Description	Test for Upper Bound Invalid	MaxLen(Description) + 1 chars	Reject / Do not proceed	Role Creation failed with Warning
UR05	Update Role	Update Role	Description	Test for Nominal	Typical sentence (20–100 chars)	Accept / Proceed	Role Created
UR06	Update Role	Update Role	Permissions	Test for Lower Bound Invalid – none	No module / permission checkbox selected	Reject / Do not proceed	Role Creation failed with Warning
UR07	Update Role	Update Role	Permissions	Test for Lower Bound valid – minimum	Exactly 1 lowest-level permission checked	Accept / Proceed	Role Created
UR08	Update Role	Update Role	Permissions	Test for Upper Bound valid – all selected	“Check All” selected for all modules	Accept / Proceed	Role Created with all permissions
UR09	Update Role	Update Role	Permissions	Test for Upper Bound valid – many selected	All permissions for one module, none for others	Accept / Proceed	Role Created, permissions limited to one module
UR10	Update Role	Update Role	Permissions	Test for mixed selection	Random mix of Create/Update/Delete/View across modules	Accept / Proceed	Role Created, permissions saved correctly
UR11	Update Role	Update Role	Permissions	Test parent/child relationship – parent only	Parent module checkbox checked, children unchecked (if supported)	Reject / Do not proceed	Parent/child rule enforced correctly
UR12	Update Role	Update Role	Permissions	Test parent/child relationship – child only	Only child menu item checked, parent unchecked	Accept / Proceed	Parent/child rule enforced correctly
UR13	Update Role	Update Role	Check All	Test global “Check All” lower bound	Click “Check All” once (select all)	Accept / Proceed	All permission checkboxes are selected
UR14	Update Role	Update Role	Check All	Test global “Check All” toggle	Click “Check All” twice (select + deselect all)	Accept / Proceed	All permission checkboxes deselected
UR15	Update Role	Update Role	Status (if any)	Test for Lower Bound valid	Status = Active	Accept / Proceed	Role Created – Active
UR16	Update Role	Update Role	Status (if any)	Test for Upper Bound valid	Status = Inactive / Disabled	Accept / Proceed	Role Created – Inactive
UR17	Update Role	Update Role	Save action	Test for mandatory fields combination	Blank Role Name + at least one permission	Reject / Do not proceed	Role Creation failed with Warning
UR18	Update Role	Update Role	Save action	Test for mandatory fields combination	Valid Role Name + no permissions	Reject / Do not proceed	Role Creation failed with Warning
UR19	Update Role	Update Role	Save action	Test for nominal successful save	Valid Role Name + Nominal Description + some permissions	Accept / Proceed	Role Created

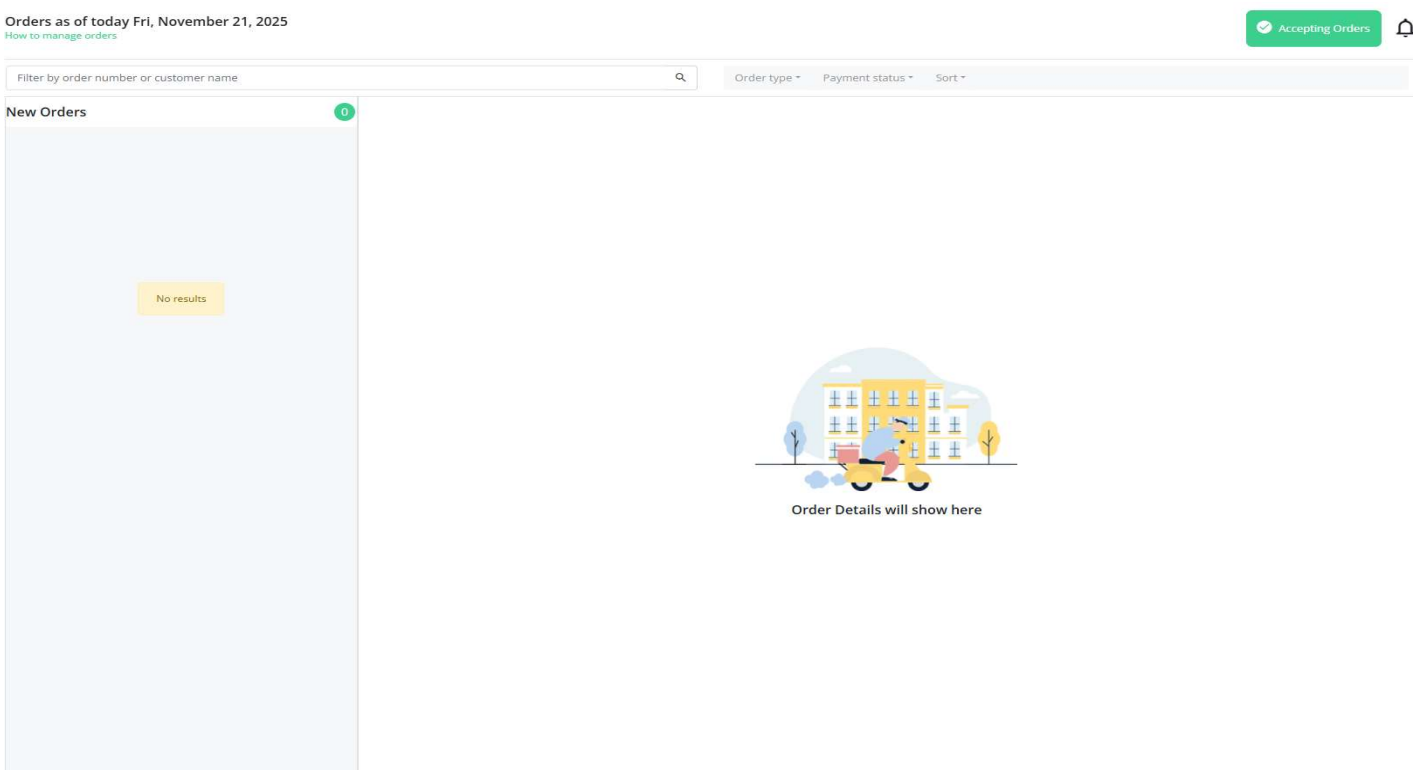
New Order Mockup



Object: New Order filtered List
Functions/ Fields:
1) Order type
2) Payment Status
3) Sort
4) Order#
5) Customer name

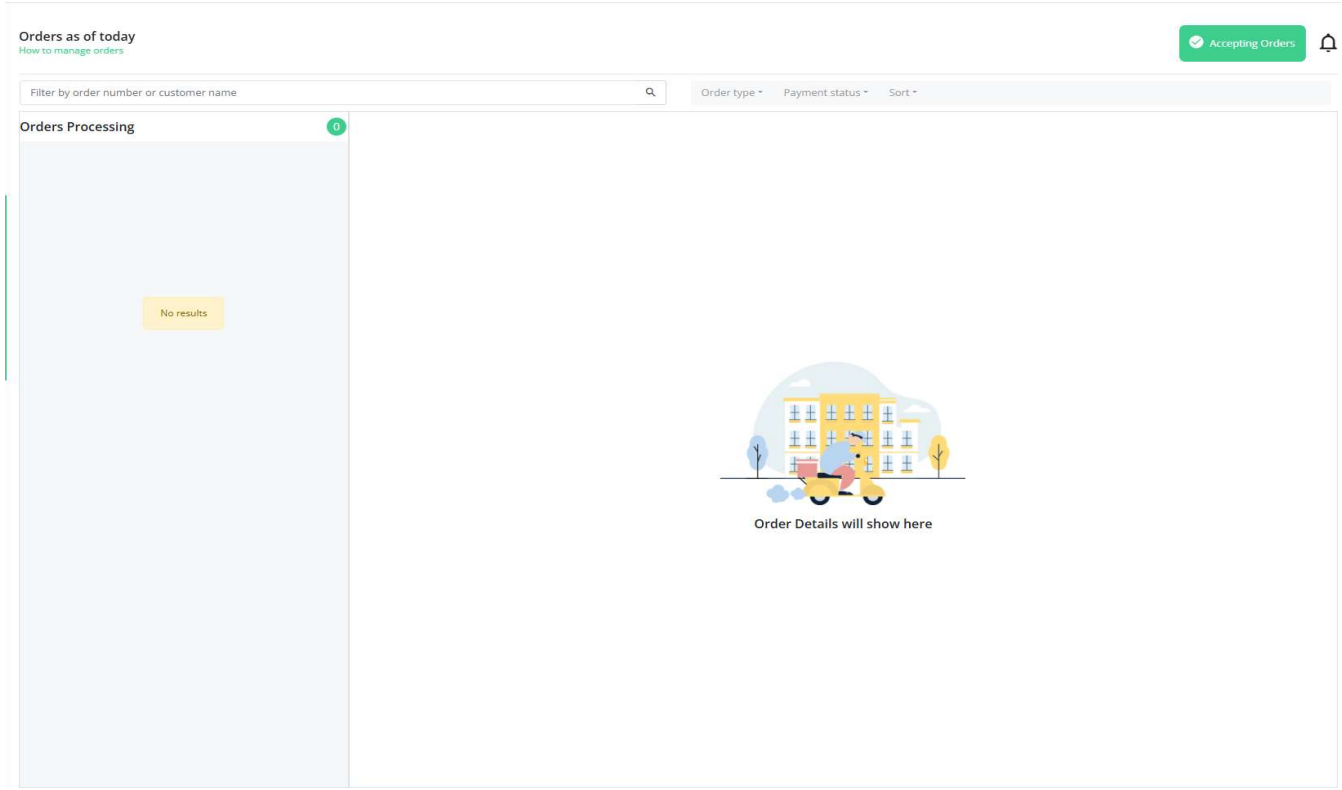
New Order Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result
NWO01	New Order filtered List	Order type	**Upper Bound All Order type filters are** applied	Open New Orders page with at least 2 different order types present; do not change Order type dropdown	All new orders, regardless of type, are displayed; Order type control shows default value (e.g. “All”)
NWO02	New Order filtered List	Order type	**Lower Bound no Order type filters are** applied	Ensure there are no “Pickup” orders for today; set Order type = Pickup	“No results” message appears in list panel; count badge shows 0; no error is shown
NWO03	New Order filtered List	Order type	**Lower Bound** Valid 1 Order type filters are applied	Create ≥3 “Delivery” orders for today; set Order type = Delivery	Only Delivery orders are listed; order count equals number of created Delivery orders; other types are not shown
NWO04	New Order filtered List	Order type	**Invalid Order type value** with Manual data entry	Manually change query param to an unsupported type (e.g. ordertype=XYZ) and load page	Page loads without crash; Order type resets to default (“All”) or shows validation error; list data still loads correctly
NWO05	New Order filtered List	Payment Status	**Lower Bound no Payment Status filter** is applied	Open New Orders page with Paid and Pending orders present; do not change Payment Status control	All new orders regardless of payment status are shown; Payment Status shows default (e.g. “All”)
NWO06	New Order filtered List	Payment Status	**Lower Bound Valid single status returning results**	Ensure at least 2 orders have status Pending; set Payment Status = Pending	Only orders with Pending status are displayed; count matches underlying data
NWO07	New Order filtered List	Payment Status	**Nominal Invalid selected status has no matching orders**	Ensure there is no order with status Failed; set Payment Status = Failed	List shows “No results”; Payment Status remains set to Failed; no system error
NWO08	New Order filtered List	Payment Status + Order type	**Upper Bound Combined filtering** of different Payment Status and Order type	Ensure at least 1 order is Delivery + Paid and at least 1 is Delivery + Pending; set Order type = Delivery, Payment Status = Paid	Only Delivery + Paid orders appear; Delivery + Pending and all non-Delivery orders are excluded
NWO09	New Order filtered List	Sort	**Nominal sort order** on initial load	Have multiple new orders with different creation times and amounts; load New Orders page with no sorting changed	List is sorted by default key (e.g. newest order first by Created Date); sort control reflects default
NWO10	New Order filtered List	Sort	**Upper Bound Ascending vs Descending** ordering	With ≥3 orders present, choose sort by Order Date Ascending, then change to Descending	Ascending: earliest order appears first; Descending: latest order appears first; order list updates correctly each time
NWO11	New Order filtered List	Sort	**Nominal Invalid identical key values**	Create 2–3 orders with same order date/time or amount; sort by that key	Orders with identical sort key remain grouped; secondary sort (e.g. Order#) is applied consistently with no random reordering
NWO12	New Order filtered List	Filter by order number or customer name (Order#)	**Nominal Exact Order# match**	Note an existing Order# (e.g. ORD12345); type full value into filter field and apply	Only the order with Order# ORD12345 is shown; results count = 1
NWO13	New Order filtered List	Filter by order number or customer name (Order#)	**Lower Bound Non-existent Order#** and minimum length behavior	Enter a valid-format but unused Order# (e.g. ORD99999) or minimum allowed characters; apply search	List shows “No results”; no crash or backend error; filter value remains visible
NWO14	New Order filtered List	Filter by order number or customer name (Order#)	**Lower Bound Invalid Leading/trailing spaces and non-numeric / invalid characters**	Input " ORD12345 " then "@@@###" and apply each	For spaced input: spaces are trimmed, valid order is found; For invalid characters: either validation message is shown or “No results” returned, per spec
NWO15	New Order filtered List	Filter by order number or customer name (Customer name)	**Lower Bound Valid case-insensitive partial name search**	Have an order for customer John Smith; type john or SMI in filter and apply	Orders whose customer name contains the entered string (John Smith) are returned regardless of case
NWO16	New Order filtered List	Filter by order number or customer name (Customer name)	**Nominal Invalid special characters in name**	Have orders for Jean-Paul and O'Neil; search using Jean, Paul, O'Neil	Corresponding orders are returned; hyphen and apostrophe are handled correctly; no search error
NWO17	New Order filtered List	Filter by order number or customer name (Customer name)	**Upper Bound valid combined name search + other filters**	Have two customers named Alex with different Order types / Payment Status; set name filter to Alex, then apply Order type = Delivery, Payment Status = Paid	Only orders for customers named Alex **and** matching Delivery + Paid appear; other Alex orders are excluded
NWO18	New Order filtered List	Filter by order number or customer name	**Upper Bound Invalid search box is cleared**	Apply any valid search (Order# or name) so list is filtered; then clear the text and apply	Filter is removed; list reverts to full result set respecting only Order type / Payment Status / Sort settings

Create an Order Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result	Actual Result	Issues
NWO01	New Order filtered List	Order type	**Upper Bound All Order type filters are** applied	Open New Orders page with at least 2 different order types present; do not change Order type dropdown	All new orders, regardless of type, are displayed; Order type control shows default value (e.g. “All”)	All new orders, regardless of type, are displayed; Order type control shows default value (e.g. “All”)	0
NWO02	New Order filtered List	Order type	**Lower Bound no Order type filters are** applied	Ensure there are no “Pickup” orders for today; set Order type = Pickup	“No results” message appears in list panel; count badge shows 0; no error is shown	“No results” message appears in list panel; count badge shows 0; no error is shown	0
NWO03	New Order filtered List	Order type	**Lower Bound** Valid 1 Order type filters are applied	Create ≥3 “Delivery” orders for today; set Order type = Delivery	Only Delivery orders are listed; order count equals number of created Delivery orders; other types are not shown	Only Delivery orders are listed; order count equals number of created Delivery orders; other types are not shown	0
NWO04	New Order filtered List	Order type	**Invalid Order type value** with Manual data entry	Manually change query param to an unsupported type (e.g. ordertype=XYZ) and load page	Page loads without crash; Order type resets to default (“All”) or shows validation error; list data still loads correctly	Page loads without crash; Order type resets to default (“All”) or shows validation error; list data still loads correctly	0
NWO05	New Order filtered List	Payment Status	**Lower Bound no Payment Status filter** is applied	Open New Orders page with Paid and Pending orders present; do not change Payment Status control	All new orders regardless of payment status are shown; Payment Status shows default (e.g. “All”)	All new orders regardless of payment status are shown; Payment Status shows default (e.g. “All”)	0
NWO06	New Order filtered List	Payment Status	**Lower Bound Valid single status returning results**	Ensure at least 2 orders have status Pending; set Payment Status = Pending	Only orders with Pending status are displayed; count matches underlying data	Only orders with Pending status are displayed; count matches underlying data	0
NWO07	New Order filtered List	Payment Status	**Nominal Invalid selected status has no matching orders**	Ensure there is no order with status Failed; set Payment Status = Failed	List shows “No results”; Payment Status remains set to Failed; no system error	List shows “No results”; Payment Status remains set to Failed; no system error	0
NWO08	New Order filtered List	Payment Status + Order type	**Upper Bound Combined filtering** of different Payment Status and Order type	Ensure at least 1 order is Delivery + Paid and at least 1 is Delivery + Pending; set Order type = Delivery, Payment Status = Paid	Only Delivery + Paid orders appear; Delivery + Pending and all non-Delivery orders are excluded	Only Delivery + Paid orders appear; Delivery + Pending and all non-Delivery orders are excluded	0
NWO09	New Order filtered List	Sort	**Nominal sort order** on initial load	Have multiple new orders with different creation times and amounts; load New Orders page with no sorting changed	List is sorted by default key (e.g. newest order first by Created Date); sort control reflects default	List is sorted by default key (e.g. newest order first by Created Date); sort control reflects default	0
NWO10	New Order filtered List	Sort	**Upper Bound Ascending vs Descending** ordering	With ≥3 orders present, choose sort by Order Date Ascending, then change to Descending	Ascending: earliest order appears first; Descending: latest order appears first; order list updates correctly each time	Ascending: earliest order appears first; Descending: latest order appears first; order list updates correctly each time	0
NWO11	New Order filtered List	Sort	**Nominal Invalid identical key values**	Create 2–3 orders with same order date/time or amount; sort by that key	Orders with identical sort key remain grouped; secondary sort (e.g. Order#) is applied consistently with no random reordering	Orders with identical sort key remain grouped; secondary sort (e.g. Order#) is applied consistently with no random reordering	0
NWO12	New Order filtered List	Filter by order number or customer name (Order#)	**Nominal Exact Order# match**	Note an existing Order# (e.g. ORD12345); type full value into filter field and apply	Only the order with Order# ORD12345 is shown; results count = 1	Only the order with Order# ORD12345 is shown; results count = 2	0
NWO13	New Order filtered List	Filter by order number or customer name (Order#)	**Lower Bound Non-existent Order#** and minimum length behavior	Enter a valid-format but unused Order# (e.g. ORD99999) or minimum allowed characters; apply search	List shows “No results”; no crash or backend error; filter value remains visible	List shows “No results”; no crash or backend error; filter value remains visible	0
NWO14	New Order filtered List	Filter by order number or customer name (Order#)	**Lower Bound Invalid Leading/trailing spaces and non-numeric / invalid characters**	Input " ORD12345 " then "@@@###" and apply each	For spaced input: spaces are trimmed, valid order is found; For invalid characters: either validation message is shown or “No results” returned, per spec	For spaced input: spaces are trimmed, valid order is found; For invalid characters: either validation message is shown or “No results” returned, per spec	0
NWO15	New Order filtered List	Filter by order number or customer name (Customer name)	**Lower Bound Valid case-insensitive partial name search**	Have an order for customer John Smith; type john or SMI in filter and apply	Orders whose customer name contains the entered string (John Smith) are returned regardless of case	Orders whose customer name contains the entered string (John Smith) are returned regardless of case	0
NWO16	New Order filtered List	Filter by order number or customer name (Customer name)	**Nominal Invalid special characters in name**	Have orders for Jean-Paul and O’Neil; search using Jean, Paul, O'Neil	Corresponding orders are returned; hyphen and apostrophe are handled correctly; no search error	Corresponding orders are returned; hyphen and apostrophe are handled correctly; no search error	0
NWO17	New Order filtered List	Filter by order number or customer name (Customer name)	**Upper Bound valid combined name search + other filters**	Have two customers named Alex with different Order types / Payment Status; set name filter to Alex, then apply Order type = Delivery, Payment Status = Paid	Only orders for customers named Alex **and** matching Delivery + Paid appear; other Alex orders are excluded	Only orders for customers named Alex **and** matching Delivery + Paid appear; other Alex orders are excluded	0
NWO18	New Order filtered List	Filter by order number or customer name	**Upper Bound Invalid search box is cleared**	Apply any valid search (Order# or name) so list is filtered; then clear the text and apply	Filter is removed; list reverts to full result set respecting only Order type / Payment Status / Sort settings	Filter is removed; list reverts to full result set respecting only Order type / Payment Status / Sort settings	0

Order Processing Mockup



Object: Order Processing filtered List
Functions/ Fields:
1) Order type
2) Payment Status
3) Sort
4) Order#
5) Customer name

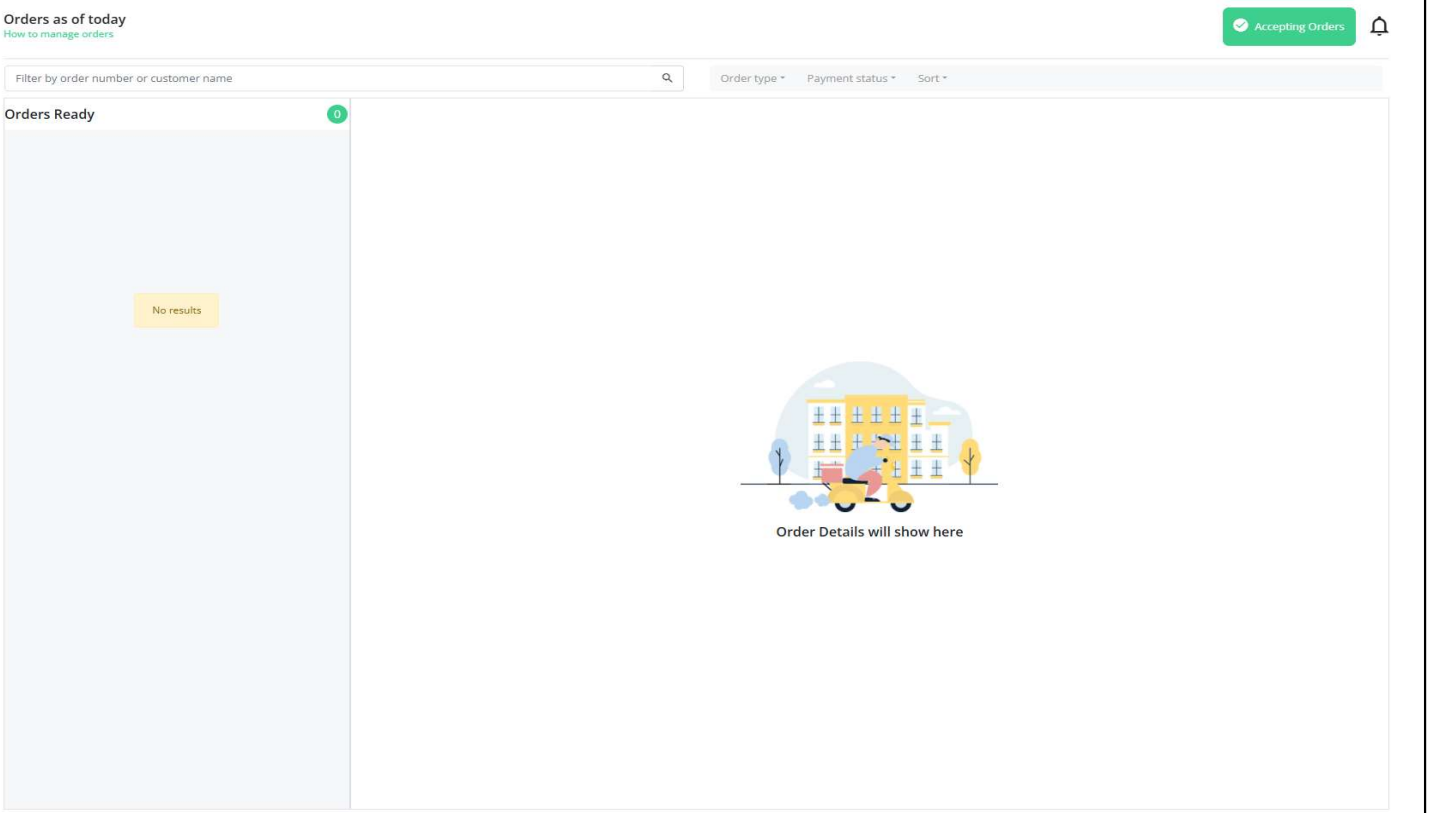
Order Processing Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result
OP001	Order Processing List	Order Status	**Upper Bound – All processing statuses shown**	Open Order Processing page with orders in *Preparing*, *Ready*, *Out for Delivery*; do not change filters	All orders across all processing statuses appear; status filter shows default "All"
OP002	Order Processing List	Order Status	**Lower Bound – No orders in selected status**	Ensure no order is in "Ready"; set status filter = Ready	"No results" shows; badge count = 0; no error
OP003	Order Processing List	Order Status	**Lower Bound Valid – Single valid status**	Create ≥3 orders in "Preparing"; set status = Preparing	Only orders in Preparing appear; total matches underlying data
OP004	Order Processing List	Order Status	**Invalid status via manual query param**	Change URL param to status=XYZ	Page loads, status resets to default or shows validation message; list still loads correctly
OP005	Order Processing	Accept Order	**Nominal – Accept action works**	Have order in "New"; click Accept	Order moves to "Preparing"; UI updates; Processing List count increments
OP006	Order Processing	Accept Order	**Lower Bound – Cannot accept already-accepted order**	Move order to Preparing; attempt Accept again via UI or URL	Accept action disabled; system rejects repeat action; no duplicate state change
OP007	Order Processing	Item Availability	**Invalid – Missing or out-of-stock item**	Create order with item flagged as "out of stock"	Accept button disabled OR warning appears; order cannot enter Preparing
OP008	Order Processing	Start Preparing	**Upper Bound – Multiple orders preparing**	Have ≥5 accepted orders; start preparing each	Each order moves to Preparing; timestamps recorded per spec; no performance degradation
OP009	Order Processing	Start Preparing	**Lower Bound – Preparation already started**	Start preparing order; click Start again	System should not duplicate preparation start; prevents duplicate timestamps
OP010	Order Processing	Complete Preparation	**Nominal – Move to Ready**	Have order in Preparing with all items confirmed	Mark as "Ready"; order moves to Ready; badge updates
OP011	Order Processing	Complete Preparation	**Invalid – Mandatory steps not completed**	Attempt to mark Preparing order as Ready without confirming items	Validation error displayed; Ready status not allowed
OP012	Order Processing	Assign Driver	**Upper Bound – Multiple driver assignments**	Have 3 orders Ready; assign same driver to all	Driver assignment succeeds when allowed; system shows driver name; no conflict unless driver capacity exceeded
OP013	Order Processing	Assign Driver	**Lower Bound – Driver unavailable**	Mark driver as inactive/busy; assign to Ready order	Error or restriction message displayed; order remains unassigned
OP014	Order Processing	Dispatch / Out for Delivery	**Nominal – Move to Out for Delivery**	Order = Ready; assign driver; click Dispatch	Order moves to Out for Delivery; dispatch time set
OP015	Order Processing	Dispatch	**Invalid – Missing driver assignment**	Ready order without driver assigned; click Dispatch	Error message "Assign driver first"; dispatch blocked
OP016	Order Processing	Complete Delivery	**Upper Bound – Successful completion**	Out for Delivery order; driver marks delivered	Order moves to "Completed"; UI badge updates; no errors
OP017	Order Processing	Complete Delivery	**Invalid – Delivery timestamp in past/future**	Manipulate timestamp via API to invalid value	System rejects invalid submission; displays validation
OP018	Order Processing	Cancel Order	**Nominal – Cancel allowed in specific states**	Cancel order in New/Preparing	Order moves to Cancelled; shown with correct color/status; reason captured
OP019	Order Processing	Cancel Order	**Invalid – Cancel not allowed**	Try cancelling order in Completed state	Cancel option hidden/disabled; cannot cancel completed orders
OP020	Order Processing	Sort	**Upper Bound – By Status, Time, Amount**	Have ≥6 orders in mixed states; sort each column	Correct order shown for each selected sort; sorted values persist visually
OP021	Order Processing	Sort	**Identical key values**	Create 3 orders with same delivery time	Orders stay grouped; secondary sort (Order#) consistent
OP022	Order Processing	Search Order# / Customer	**Exact match**	Enter exact Order# into search	Only matching order displays; result count = 1
OP023	Order Processing	Search Order# / Customer	**Lower Bound – Nonexistent order**	Enter unused Order#	"No results"; search value remains
OP024	Order Processing	Search Order# / Customer	**Trimmed / Invalid characters**	Enter " ORD12345 " then "!@#@"	Spaces trimmed → valid match; invalid chars → validation or no results
OP025	Order Processing	Search Customer	**Partial, case-insensitive**	Enter partial "john"	Orders with customers matching substring displayed
OP026	Order Processing	Search Customer	**Special characters**	Orders for "O'Conner", "Jean-Paul"; search with variations	Names correctly matched; hyphens/apostrophes handled
OP027	Order Processing	Search + Filters	**Combined filters upper bound**	Search name "Alex"; status = Preparing; driver = Assigned	Only orders matching all criteria shown
OP028	Order Processing	Search	**Clear search**	Apply any search; clear input and apply	Full list restores respecting status/sort filters

Order Processing Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result	Actual Result	Issues
OP001	Order Processing List	Order Status	**Upper Bound – All processing statuses shown**	Open Order Processing page with orders in *Preparing* , *Ready* , *Out for Delivery* ; do not change filters	All orders across all processing statuses appear; status filter shows default “All”	All orders across all processing statuses appear; status filter shows default “All”	0
OP002	Order Processing List	Order Status	**Lower Bound – No orders in selected status**	Ensure no order is in “Ready”; set status filter = Ready	“No results” shows; badge count = 0; no error	“No results” shows; badge count = 0; no error	0
OP003	Order Processing List	Order Status	**Lower Bound Valid – Single valid status**	Create orders in “Preparing”; set status = Preparing	Only orders in Preparing appear; total matches underlying data	Only orders in Preparing appear; total matches underlying data	0
OP004	Order Processing List	Order Status	**Invalid status via manual query param**	Change URL param to status=XYZ	Page loads, status resets to default or shows validation message; list still loads correctly	Page loads, status resets to default or shows validation message; list still loads correctly	0
OP005	Order Processing	Accept Order	**Nominal – Accept action works**	Have order in “New”; click Accept	Order moves to “Preparing”; UI updates; Processing List count increments	Order moves to “Preparing”; UI updates; Processing List count increments	0
OP006	Order Processing	Accept Order	**Lower Bound – Cannot accept already-accepted order**	Move order to Preparing; attempt Accept again via UI or URL	Accept action disabled; system rejects repeat action; no duplicate state change	Accept action disabled; system rejects repeat action; no duplicate state change	0
OP007	Order Processing	Item Availability	**Invalid – Missing or out-of-stock item**	Create order with item flagged as “out of stock”	Accept button disabled OR warning appears; order cannot enter Preparing	Accept button disabled OR warning appears; order cannot enter Preparing	0
OP008	Order Processing	Start Preparing	**Upper Bound – Multiple orders preparing**	Have ≥5 accepted orders; start preparing each	Each order moves to Preparing; timestamps recorded per spec; no performance degradation	Each order moves to Preparing; timestamps recorded per spec; no performance degradation	0
OP009	Order Processing	Start Preparing	**Lower Bound – Preparation already started**	Start preparing order; click Start again	System should not duplicate preparation start; prevents duplicate timestamps	System should not duplicate preparation start; prevents duplicate timestamps	0
OP010	Order Processing	Complete Preparation	**Nominal – Move to Ready**	Have order in Preparing with all items confirmed	Mark as “Ready”; order moves to Ready; badge updates	Mark as “Ready”; order moves to Ready; badge updates	0
OP011	Order Processing	Complete Preparation	**Invalid – Mandatory steps not completed**	Attempt to mark Preparing order as Ready without confirming items	Validation error displayed; Ready status not allowed	Validation error displayed; Ready status not allowed	0
OP012	Order Processing	Assign Driver	**Upper Bound – Multiple driver assignments**	Have 3 orders Ready; assign same driver to all	Driver assignment succeeds when allowed; system shows driver name; no conflict unless driver capacity exceeded	Driver assignment succeeds when allowed; system shows driver name; no conflict unless driver capacity exceeded	0
OP013	Order Processing	Assign Driver	**Lower Bound – Driver unavailable**	Mark driver as inactive/busy; assign to Ready order	Error or restriction message displayed; order remains unassigned	Error or restriction message displayed; order remains unassigned	0
OP014	Order Processing	Dispatch / Out for Delivery	**Nominal – Move to Out for Delivery**	Order = Ready; assign driver; click Dispatch	Order moves to Out for Delivery; dispatch time set	Order moves to Out for Delivery; dispatch time set	0
OP015	Order Processing	Dispatch	**Invalid – Missing driver assignment**	Ready order without driver assigned; click Dispatch	Error message “Assign driver first”; dispatch blocked	Error message “Assign driver first”; dispatch blocked	0
OP016	Order Processing	Complete Delivery	**Upper Bound – Successful completion**	Out for Delivery order; driver marks delivered	Order moves to “Completed”; UI badge updates; no errors	Order moves to “Completed”; UI badge updates; no errors	0
OP017	Order Processing	Complete Delivery	**Invalid – Delivery timestamp in past/future**	Manipulate timestamp via API to invalid value	System rejects invalid submission; displays validation	System rejects invalid submission; displays validation	0
OP018	Order Processing	Cancel Order	**Nominal – Cancel allowed in specific states**	Cancel order in New/Preparing	Order moves to Cancelled; shown with correct color/status; reason captured	Order moves to Cancelled; shown with correct color/status; reason captured	0
OP019	Order Processing	Cancel Order	**Invalid – Cancel not allowed**	Try cancelling order in Completed state	Cancel option hidden/disabled; cannot cancel completed orders	Cancel option hidden/disabled; cannot cancel completed orders	0
OP020	Order Processing	Sort	**Upper Bound – By Status, Time, Amount**	Have ≥6 orders in mixed states; sort each column	Correct order shown for each selected sort; sorted values persist visually	Correct order shown for each selected sort; sorted values persist visually	0
OP021	Order Processing	Sort	**Identical key values**	Create 3 orders with same delivery time	Orders stay grouped; secondary sort (Order#) consistent	Orders stay grouped; secondary sort (Order#) consistent	0
OP022	Order Processing	Search Order# / Customer	**Exact match**	Enter exact Order# into search	Only matching order displays; result count = 1	Only matching order displays; result count = 2	0
OP023	Order Processing	Search Order# / Customer	**Lower Bound – Nonexistent order**	Enter unused Order#	“No results”; search value remains	“No results”; search value remains	0
OP024	Order Processing	Search Order# / Customer	**Trimmed / Invalid characters**	Enter " ORD12345 " then "!@#@"	Spaces trimmed → valid match; invalid chars → validation or no results	Spaces trimmed → valid match; invalid chars → validation or no results	0
OP025	Order Processing	Search Customer	**Partial, case-insensitive**	Enter partial “john”	Orders with customers matching substring displayed	Orders with customers matching substring displayed	0
OP026	Order Processing	Search Customer	**Special characters**	Orders for “O’Conner”, “Jean-Paul"; search with variations	Names correctly matched; hyphens/apostrophes handled	Names correctly matched; hyphens/apostrophes handled	0
OP027	Order Processing	Search + Filters	**Combined filters upper bound**	Search name “Alex”; status = Preparing; driver = Assigned	Only orders matching all criteria shown	Only orders matching all criteria shown	0
OP028	Order Processing	Search	**Clear search**	Apply any search; clear input and apply	Full list restores respecting status/sort filters	Full list restores respecting status/sort filters	0

Order Ready Mockup



Object: Order Ready filtered List
Functions/ Fields:
1) Order type
2) Payment Status
3) Sort
4) Order#
5) Customer name

Order Ready Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result
RWO01	Orders Ready filtered List	Order type	**Upper Bound All Order type filters are applied**	Open Orders Ready page with at least 2 different order types present; do not change Order type dropdown	All ready orders, regardless of type, are displayed; Order type control shows default value (e.g. “All”)
RWO02	Orders Ready filtered List	Order type	**Lower Bound no Order type filters are applied**	Ensure there are no “Pickup” orders in Ready state for today; set Order type = Pickup	“No results” message appears in list panel; count badge shows 0; no error is shown
RWO03	Orders Ready filtered List	Order type	**Lower Bound Valid 1 Order type filter is applied**	Create ≥3 “Delivery” orders and move them to Ready; set Order type = Delivery	Only Ready + Delivery orders are listed; order count equals number of such orders; other types are not shown
RWO04	Orders Ready filtered List	Order type	**Invalid Order type value with manual data entry**	Manually change query param to an unsupported type (e.g. ordertype=XYZ) and load page	Page loads without crash; Order type resets to default (“All”) or shows validation error; list data still loads correctly
RWO05	Orders Ready filtered List	Payment Status	**Lower Bound no Payment Status filter is applied**	Open Orders Ready page with Paid and Pending ready orders present; do not change Payment Status	All ready orders regardless of payment status are shown; Payment Status shows default (e.g. “All”)
RWO06	Orders Ready filtered List	Payment Status	**Lower Bound Valid single status returning results**	Ensure at least 2 ready orders have status Pending; set Payment Status = Pending	Only ready orders with Pending status are displayed; count matches underlying data
RWO07	Orders Ready filtered List	Payment Status	**Nominal Invalid selected status has no matching orders**	Ensure there is no ready order with status Failed; set Payment Status = Failed	List shows “No results”; Payment Status remains set to Failed; no system error
RWO08	Orders Ready filtered List	Payment Status + Order type	**Upper Bound Combined filtering of different Payment Status and Order type**	Ensure at least 1 order is Ready + Delivery + Paid and at least 1 is Ready + Delivery + Pending; set	Only Ready + Delivery + Paid orders appear; Ready + Delivery + Pending and all non-Delivery ready orders are excluded
RWO09	Orders Ready filtered List	Sort	**Nominal sort order on initial load**	Have multiple ready orders with different creation times and amounts; load Orders Ready page with no	List is sorted by default key (e.g. newest ready order first by Ready Date/Created Date); sort control reflects default
RWO10	Orders Ready filtered List	Sort	**Upper Bound Ascending vs Descending ordering**	With ≥3 ready orders present, choose sort by Ready Date Ascending, then change to Descending	Ascending: earliest Ready Date appears first; Descending: latest Ready Date appears first; order list updates correctly each time
RWO11	Orders Ready filtered List	Sort	**Nominal Invalid identical key values**	Create 2–3 ready orders with same Ready date/time or amount; sort by that key	Orders with identical sort key remain grouped; secondary sort (e.g. Order#) is applied consistently with no random reordering
RWO12	Orders Ready filtered List	Filter by order number or customer name (Order#)	**Nominal Exact Order# match**	Note an existing Ready Order# (e.g. ORD12345); type full value into filter field and apply	Only the ready order with Order# ORD12345 is shown; results count = 1
RWO13	Orders Ready filtered List	Filter by order number or customer name (Order#)	**Lower Bound Non-existent Order# and minimum length behavior**	Enter a valid-format but unused Order# (e.g. ORD99999) or minimum allowed characters; apply	List shows “No results”; no crash or backend error; filter value remains visible
RWO14	Orders Ready filtered List	Filter by order number or customer name (Order#)	**Lower Bound Invalid leading/trailing spaces and non-numeric / invalid characters**	Input " ORD12345 " then "@@@###" and apply each	For spaced input: spaces are trimmed, valid ready order is found; For invalid characters: either validation message is shown or “No results” returned, per
RWO15	Orders Ready filtered List	Filter by order number or customer name (Customer name)	**Lower Bound Valid case-insensitive partial name search**	Have a ready order for customer John Smith; type john or SMI in filter and apply	Ready orders whose customer name contains the entered string (John Smith) are returned regardless of case
RWO16	Orders Ready filtered List	Filter by order number or customer name (Customer name)	**Nominal Invalid special characters in name**	Have ready orders for Jean-Paul and O’Neil; search using Jean, Paul, O'Neil	Corresponding ready orders are returned; hyphen and apostrophe are handled correctly; no search error
RWO17	Orders Ready filtered List	Filter by order number or customer name (Customer	**Upper Bound valid combined name search + other filters**	Have two customers named Alex with different Order types / Payment Status in Ready state; set name filter	Only ready orders for customers named Alex and matching Delivery + Paid appear; other Alex ready orders are excluded
RWO18	Orders Ready filtered List	Filter by order number or customer name	**Upper Bound Invalid search box is cleared**	Apply any valid search (Order# or name) so ready list is filtered; then clear the text and apply	Filter is removed; list reverts to full set of Ready orders respecting only Order type / Payment Status / Sort settings

Order Ready Boundary Conditions

TC#	Area	Data Field / Control	Test Objective	Test Data / Setup	Expected Result	Actual Result	Issues
RWO01	Orders Ready filtered List	Order type	**Upper Bound All Order type filters are applied**	Open Orders Ready page with at least 2 different order types present; do not change Order type dropdown	All ready orders, regardless of type, are displayed; Order type control shows default value (e.g. “All”)	All ready orders, regardless of type, are displayed; Order type control shows default value (e.g. “All”)	0
RWO02	Orders Ready filtered List	Order type	**Lower Bound no Order type filters are applied**	Ensure there are no “Pickup” orders in Ready state for today; set Order type = Pickup	“No results” message appears in list panel; count badge shows 0; no error is shown	“No results” message appears in list panel; count badge shows 0; no error is shown	0
RWO03	Orders Ready filtered List	Order type	**Lower Bound Valid 1 Order type filter is applied**	Create ≥3 “Delivery” orders and move them to Ready; set Order type = Delivery	Only Ready + Delivery orders are listed; order count equals number of such orders; other types are not shown	Only Ready + Delivery orders are listed; order count equals number of such orders; other types are not shown	0
RWO04	Orders Ready filtered List	Order type	**Invalid Order type value with manual data entry**	Manually change query param to an unsupported type (e.g. ordertype=XYZ) and load page	Page loads without crash; Order type resets to default (“All”) or shows validation error; list data still loads correctly	Page loads without crash; Order type resets to default (“All”) or shows validation error; list data still loads correctly	0
RWO05	Orders Ready filtered List	Payment Status	**Lower Bound no Payment Status filter is applied**	Open Orders Ready page with Paid and Pending ready orders present; do not change Payment Status control	All ready orders regardless of payment status are shown; Payment Status shows default (e.g. “All”)	All ready orders regardless of payment status are shown; Payment Status shows default (e.g. “All”)	0
RWO06	Orders Ready filtered List	Payment Status	**Lower Bound Valid single status returning results**	Ensure at least 2 ready orders have status Pending; set Payment Status = Pending	Only ready orders with Pending status are displayed; count matches underlying data	Only ready orders with Pending status are displayed; count matches underlying data	0
RWO07	Orders Ready filtered List	Payment Status	**Nominal Invalid selected status has no matching orders**	Ensure there is no ready order with status Failed; set Payment Status = Failed	List shows “No results”; Payment Status remains set to Failed; no system error	List shows “No results”; Payment Status remains set to Failed; no system error	0
RWO08	Orders Ready filtered List	Payment Status + Order type	**Upper Bound Combined filtering of different Payment Status and Order type**	Ensure at least 1 order is Ready + Delivery + Paid and at least 1 is Ready + Delivery + Pending; set Order type = Delivery, Payment Status = Paid	Only Ready + Delivery + Paid orders appear; Ready + Delivery + Pending and all non-Delivery ready orders are excluded	Only Ready + Delivery + Paid orders appear; Ready + Delivery + Pending and all non-Delivery ready orders are excluded	0
RWO09	Orders Ready filtered List	Sort	**Nominal sort order on initial load**	Have multiple ready orders with different creation times and amounts; load Orders Ready page with no sorting changed	List is sorted by default key (e.g. newest ready order first by Ready Date/Created Date); sort control reflects default	List is sorted by default key (e.g. newest ready order first by Ready Date/Created Date); sort control reflects default	0
RWO10	Orders Ready filtered List	Sort	**Upper Bound Ascending vs Descending ordering**	With ≥3 ready orders present, choose sort by Ready Date Ascending, then change to Descending	Ascending: earliest Ready Date appears first; Descending: latest Ready Date appears first; order list updates correctly each time	Ascending: earliest Ready Date appears first; Descending: latest Ready Date appears first; order list updates correctly each time	0
RWO11	Orders Ready filtered List	Sort	**Nominal Invalid identical key values**	Create 2–3 ready orders with same Ready date/time or amount; sort by that key	Orders with identical sort key remain grouped; secondary sort (e.g. Order#) is applied consistently with no random reordering	Orders with identical sort key remain grouped; secondary sort (e.g. Order#) is applied consistently with no random reordering	0
RWO12	Orders Ready filtered List	Filter by order number or customer name (Order#)	**Nominal Exact Order# match**	Note an existing Ready Order# (e.g. ORD12345); type full value into filter field and apply	Only the ready order with Order# ORD12345 is shown; results count = 1	Only the ready order with Order# ORD12345 is shown; results count = 2	0
RWO13	Orders Ready filtered List	Filter by order number or customer name (Order#)	**Lower Bound Non-existent Order# and minimum length behavior**	Enter a valid-format but unused Order# (e.g. ORD99999) or minimum allowed characters; apply search	List shows “No results”; no crash or backend error; filter value remains visible	List shows “No results”; no crash or backend error; filter value remains visible	0
RWO14	Orders Ready filtered List	Filter by order number or customer name (Order#)	**Lower Bound Invalid leading/trailing spaces and non-numeric / invalid characters**	Input " ORD12345 " then "@@@###" and apply each	For spaced input: spaces are trimmed, valid ready order is found; For invalid characters: either validation message is shown or “No results” returned, per spec	For spaced input: spaces are trimmed, valid ready order is found; For invalid characters: either validation message is shown or “No results” returned, per spec	0
RWO15	Orders Ready filtered List	Filter by order number or customer name (Customer	**Lower Bound Valid case-insensitive partial name search**	Have a ready order for customer John Smith; type john or SMI in filter and apply	Ready orders whose customer name contains the entered string (John Smith) are returned regardless of case	Ready orders whose customer name contains the entered string (John Smith) are returned regardless of case	0
RWO16	Orders Ready filtered List	Filter by order number or customer name (Customer	**Nominal Invalid special characters in name**	Have ready orders for Jean-Paul and O’Neil; search using Jean, Paul, O'Neil	Corresponding ready orders are returned; hyphen and apostrophe are handled correctly; no search error	Corresponding ready orders are returned; hyphen and apostrophe are handled correctly; no search error	0
RWO17	Orders Ready filtered List	Filter by order number or customer name (Customer	**Upper Bound valid combined name search + other filters**	Have two customers named Alex with different Order types / Payment Status in Ready state; set name filter to Alex, then apply Order type = Delivery, Payment Status = Paid	Only ready orders for customers named Alex and matching Delivery + Paid appear; other Alex ready orders are excluded	Only ready orders for customers named Alex and matching Delivery + Paid appear; other Alex ready orders are excluded	0
RWO18	Orders Ready filtered List	Filter by order number or customer name	**Upper Bound Invalid search box is cleared**	Apply any valid search (Order# or name) so ready list is filtered; then clear the text and apply	Filter is removed; list reverts to full set of Ready orders respecting only Order type / Payment Status / Sort settings	Filter is removed; list reverts to full set of Ready orders respecting only Order type / Payment Status / Sort settings	0

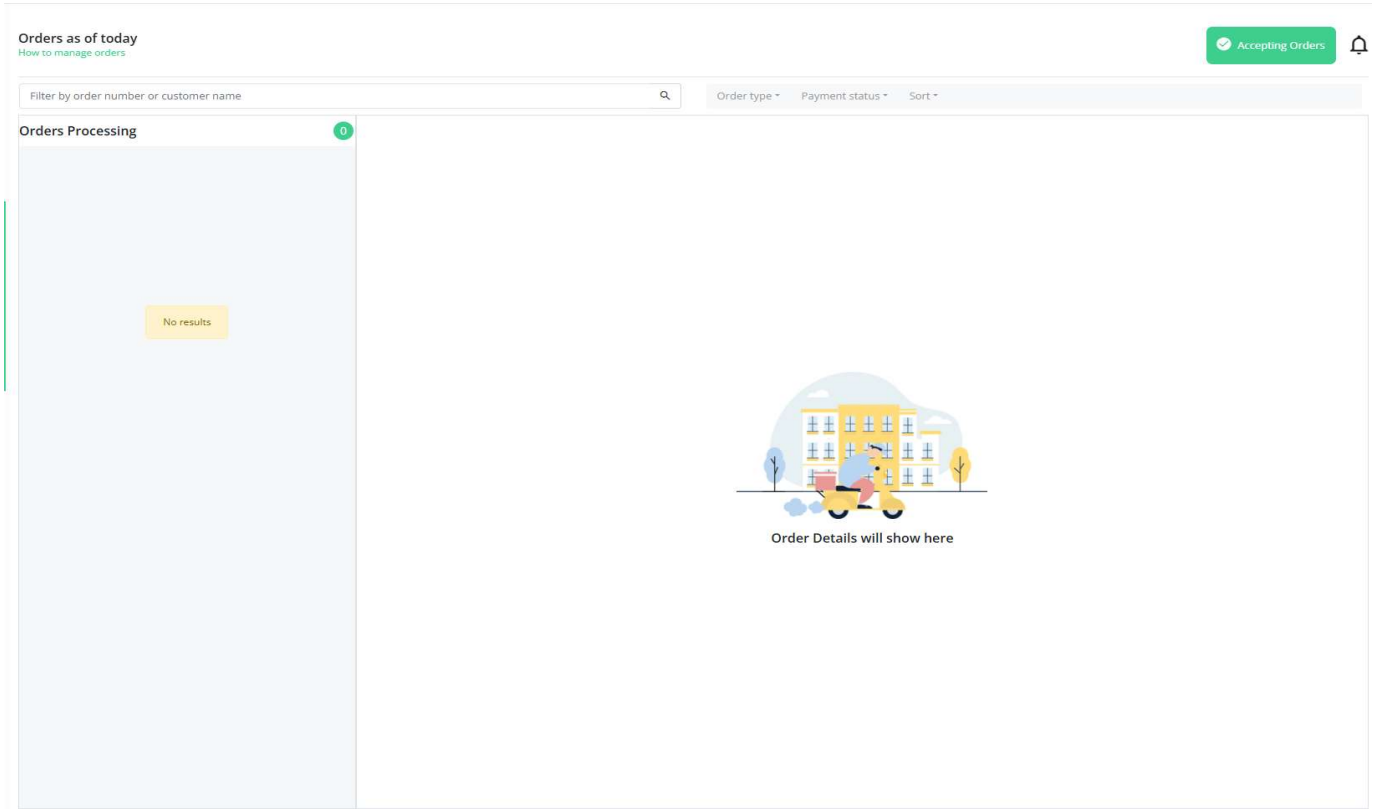
Order Processing Mockup



Object: Order Processing filtered List
Functions/ Fields:
1) Order type (Delivery/ Pickup/ Takeout/ DineIn)
2) Payment Status (Paid/ Unpaid/ Pending/ Failed/ Cancelled)
3) Sort (Order ID (Ascending/ Descending) Delivery Time (Ascending /Descending)
4) Order#
5) Customer name

Order Processing - State Transition

TC#	Field / Control	Current State	Test Data	Event / Trigger	Next State	Remarks / Issues
OP01	Order type	Order Processing Complete List	No Orders	No Order Processings placed	Empty Order Processings List	0
OP02	Order type	Order Processing Complete List	1 Order (Delivery)	Placing 1 Order	Order Processings List with Single Data Delivery Record	0
OP03	Order type	Order Processing Complete List	1 Order (Pickup)	Placing 1 Order	Order Processings List with Single Data Pickup Record	0
OP04	Order type	Order Processing Complete List	1 Order (Takeout)	Placing 1 Order	Order Processings List with Single Data Takeout Record	0
OP05	Order type	Order Processing Complete List	1 Order (DineIn)	Placing 1 Order	Order Processings List with Single Data DineIn Record	0
OP06	Payment Status	Order Processing Complete List	1 Order (Paid)	Placing 1 Order	Order Processings List with Single Data Paid Record	0
OP07	Payment Status	Order Processing Complete List	1 Order (Unpaid)	Placing 1 Order	Order Processings List with Single Data Unpaid Record	0
OP08	Payment Status	Order Processing Complete List	1 Order (Pending)	Placing 1 Order	Order Processings List with Single Data Pending Record	0
OP09	Payment Status	Order Processing Complete List	1 Order (Failed)	Placing 1 Order	Order Processings List with Single Data Failed Record	0
OP10	Payment Status	Order Processing Complete List	1 Order (Cancelled)	Placing 1 Order	Order Processings List with Single Data Cancelled Record	0
OP11	Payment Status/Order Type	Order Processing Complete List	10 Orders	Placing 10 Orders	Order Processings List full Single Page	0
OP12	Payment Status/Order Type	Order Processing Complete List	11 Orders	Placing 11 Orders	Order Processings List full Single Page and Single data record on a new Page	0
OP13	Sort	Order Processing Complete List	Full Page of Orders	Ascending filter/ sorting selection for Orders ID	Order Processings List with Ascending Data for Orders ID	0
OP14	Sort	Order Processing Complete List	Full Page of Orders	Ascending filter/ sorting selection for Delivery time	Order Processings List with Ascending Data for Delivery time	0
OP15	Sort	Order Processing Complete List	Full Page of Orders	Descending filter/ sorting selection for Orders ID	Order Processings List with Descending Data for Orders ID	0
OP16	Sort	Order Processing Complete List	Full Page of Orders	Descending filter/ sorting selection for Delivery time	Order Processings List with Descending Data for Delivery time	0
OP17	Filter by order number or customer name (Order#)	Order Processing Complete List	Full Page of Orders	Search for an Order#	Order Processings List with Order#	0
OP18	Filter by order number or customer name (Customer name)	Order Processing Complete List	Full Page of Orders	Search for an Customer name	Order Processing List for Customer name	0

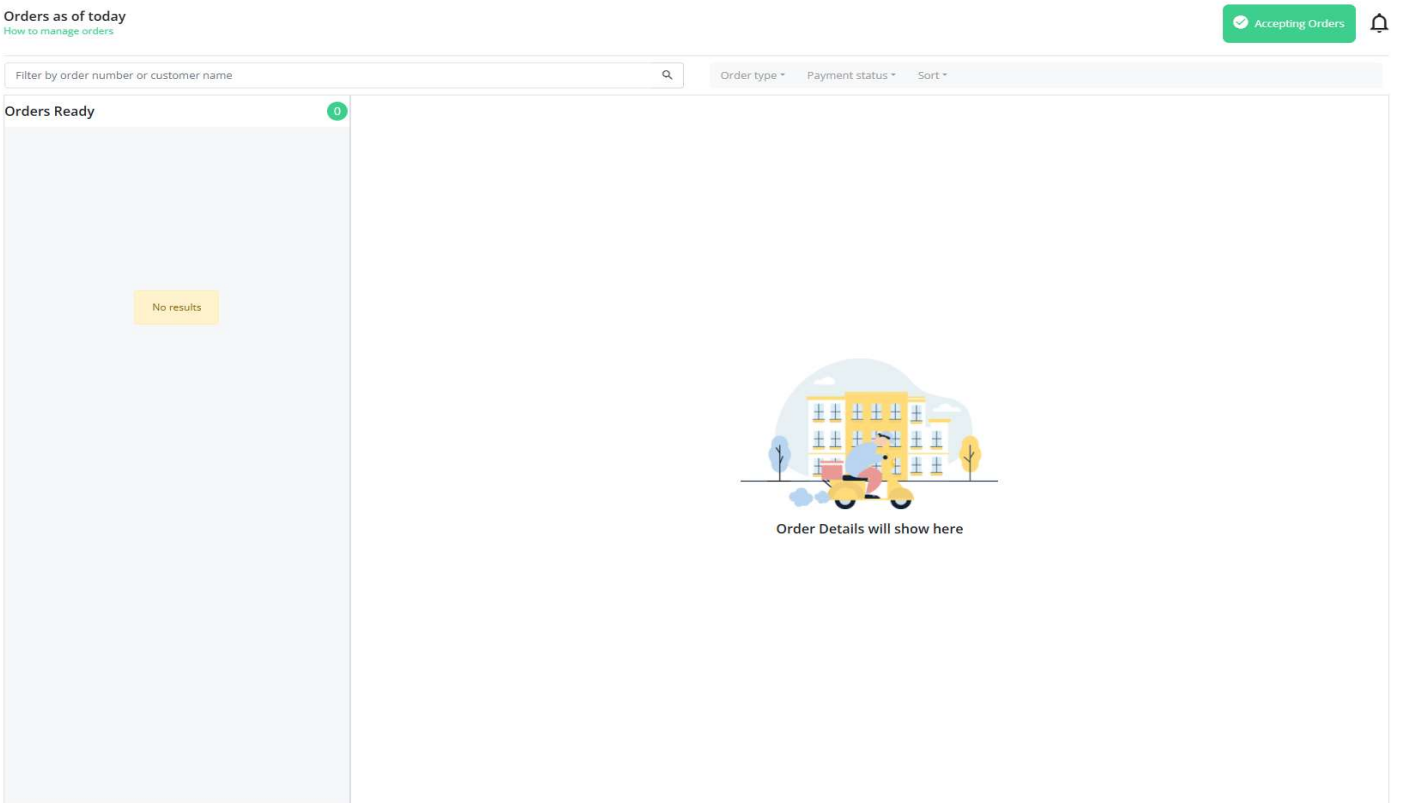
Order Ready Mockup



Object: Orders Ready filtered List
Functions/ Fields:
1) Order type (Delivery/ Pickup/ Takeout/ DineIn)
2) Payment Status (Paid/ Unpaid/ Pending/ Failed/ Cancelled)
3) Sort (Order ID (Ascending/ Descending) Delivery Time (Ascending /Descending)
4) Order#
5) Customer name

Order Ready - State Transition

TC#	Field / Control	Current State	Test Data	Event / Trigger	Next State	Remarks / Issues
OR01	Order type	Orders Ready Complete List	No Orders	No Orders Ready placed	Empty Orders Ready List	0
OR02	Order type	Orders Ready Complete List	1 Order (Delivery)	Placing 1 Order	Orders Ready List with Single Data Delivery Record	0
OR03	Order type	Orders Ready Complete List	1 Order (Pickup)	Placing 1 Order	Orders Ready List with Single Data Pickup Record	0
OR04	Order type	Orders Ready Complete List	1 Order (Takeout)	Placing 1 Order	Orders Ready List with Single Data Takeout Record	0
OR05	Order type	Orders Ready Complete List	1 Order (DineIn)	Placing 1 Order	Orders Ready List with Single Data DineIn Record	0
OR06	Payment Status	Orders Ready Complete List	1 Order (Paid)	Placing 1 Order	Orders Ready List with Single Data Paid Record	0
OR07	Payment Status	Orders Ready Complete List	1 Order (Unpaid)	Placing 1 Order	Orders Ready List with Single Data Unpaid Record	0
OR08	Payment Status	Orders Ready Complete List	1 Order (Pending)	Placing 1 Order	Orders Ready List with Single Data Pending Record	0
OR09	Payment Status	Orders Ready Complete List	1 Order (Failed)	Placing 1 Order	Orders Ready List with Single Data Failed Record	0
OR10	Payment Status	Orders Ready Complete List	1 Order (Cancelled)	Placing 1 Order	Orders Ready List with Single Data Cancelled Record	0
OR11	Payment Status/Order Type	Orders Ready Complete List	10 Orders	Placing 10 Orders	Orders Ready List full Single Page	0
OR12	Payment Status/Order Type	Orders Ready Complete List	11 Orders	Placing 11 Orders	Orders Ready List full Single Page and Single data record on a new Page	0
OR13	Sort	Orders Ready Complete List	Full Page of Orders	Ascending filter/ sorting selection for Orders ID	Orders Ready List with Ascending Data for Orders ID	0
OR14	Sort	Orders Ready Complete List	Full Page of Orders	Ascending filter/ sorting selection for Delivery time	Orders Ready List with Ascending Data for Delivery time	0
OR15	Sort	Orders Ready Complete List	Full Page of Orders	Descending filter/ sorting selection for Orders ID	Orders Ready List with Descending Data for Orders ID	0
OR16	Sort	Orders Ready Complete List	Full Page of Orders	Descending filter/ sorting selection for Delivery time	Orders Ready List with Descending Data for Delivery time	0
OR17	Filter by order number or customer name (Order#)	Orders Ready Complete List	Full Page of Orders	Search for an Order#	Orders Ready List with Order#	0
OR18	Filter by order number or customer name (Customer name)	Orders Ready Complete List	Full Page of Orders	Search for an Customer name	Orders Ready List for Customer name	0

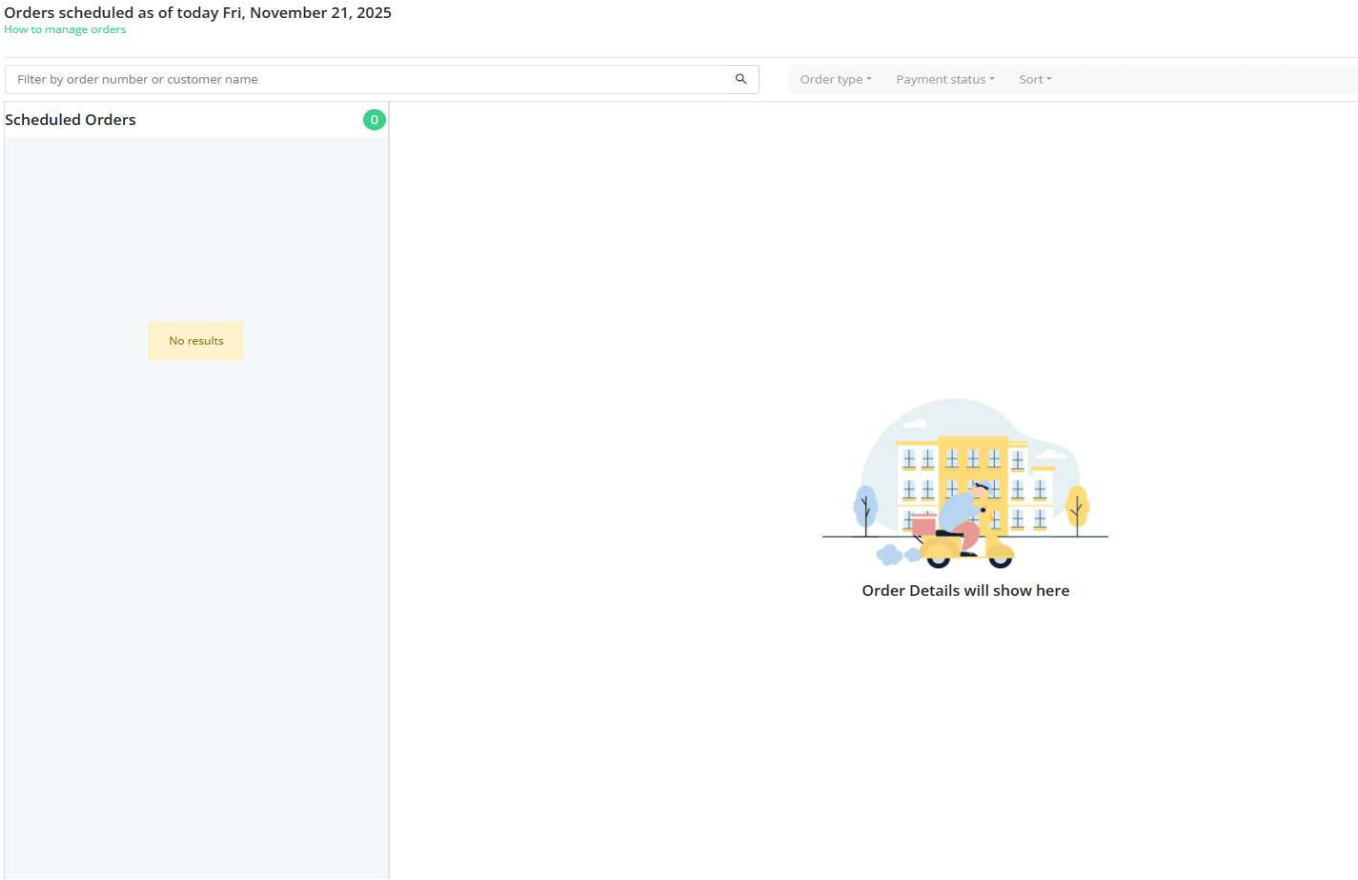
Scheduled-Mockup



Object: Scheduled Order filtered List
Functions/ Fields:
1) Order type (Delivery/ Pickup/ Takeout/ DineIn)
2) Payment Status (Paid/ Unpaid/ Pending/ Failed/ Cancelled)
3) Sort (Order ID (Ascending/ Descending) Delivery Time (Ascending /Descending)
4) Order#
5) Customer name

Scheduled - State Transition

TC#	Field / Control	Current State	Test Data	Event / Trigger	Next State	Remarks / Issues
C01	Order type	Scheduled Orders Complete List	No Orders	No Scheduled Orders placed	Empty Scheduled Orders List	1
C02	Order type	Scheduled Orders Complete List	1 Order (Delivery)	Placing 1 Order	Scheduled Orders List with Single Data Delivery Record	1
C03	Order type	Scheduled Orders Complete List	1 Order (Pickup)	Placing 1 Order	Scheduled Orders List with Single Data Pickup Record	1
C04	Order type	Scheduled Orders Complete List	1 Order (Takeout)	Placing 1 Order	Scheduled Orders List with Single Data Takeout Record	1
C05	Order type	Scheduled Orders Complete List	1 Order (DineIn)	Placing 1 Order	Scheduled Orders List with Single Data DineIn Record	1
C06	Payment Status	Scheduled Orders Complete List	1 Order (Paid)	Placing 1 Order	Scheduled Orders List with Single Data Paid Record	1
C07	Payment Status	Scheduled Orders Complete List	1 Order (Unpaid)	Placing 1 Order	Scheduled Orders List with Single Data Unpaid Record	1
C08	Payment Status	Scheduled Orders Complete List	1 Order (Pending)	Placing 1 Order	Scheduled Orders List with Single Data Pending Record	1
C09	Payment Status	Scheduled Orders Complete List	1 Order (Failed)	Placing 1 Order	Scheduled Orders List with Single Data Failed Record	1
C10	Payment Status	Scheduled Orders Complete List	1 Order (Cancelled)	Placing 1 Order	Scheduled Orders List with Single Data Cancelled Record	1
C11	Payment Status/Order Type	Scheduled Orders Complete List	10 Orders	Placing 10 Orders	Scheduled Orders List full Single Page	1
C12	Payment Status/Order Type	Scheduled Orders Complete List	11 Orders	Placing 11 Orders	Scheduled Orders List full Single Page and Single data record on a new Page	1
C13	Sort	Scheduled Orders Complete List	Full Page of Orders	Ascending filter/ sorting selection for Orders ID	Scheduled Orders List with Ascending Data for Orders ID	1
C14	Sort	Scheduled Orders Complete List	Full Page of Orders	Ascending filter/ sorting selection for Delivery time	Scheduled Orders List with Ascending Data for Delivery time	1
C15	Sort	Scheduled Orders Complete List	Full Page of Orders	Descending filter/ sorting selection for Orders ID	Scheduled Orders List with Descending Data for Orders ID	1
C16	Sort	Scheduled Orders Complete List	Full Page of Orders	Descending filter/ sorting selection for Delivery time	Scheduled Orders List with Descending Data for Delivery time	1
C17	Filter by order number or customer	Scheduled Orders Complete List	Full Page of Orders	Search for an Order#	Scheduled Orders List with Order#	1
C18	Filter by order number or customer	Scheduled Orders Complete List	Full Page of Orders	Search for an Customer name	Scheduled Orders List for Customer name	1
